Modernizing VATs in Africa Sijbren Cnossen,2019-07-12 Most African countries are in dire need of more tax revenue In 28 out of 45 countries with a value added tax VAT total tax revenue as a percentage of GDP is around 15% or less falling short of what is necessary to finance basic human and economic development Far from being revenue raising instruments current African VATs are riddled with exemptions exclusions and zero rates on domestic goods and services that depress revenue are highly distortionary and greatly complicate the administration of VAT

Modernizing VATs in Africa enables policymakers professionals and students to analyse African tax systems to ascertain how they can be modernized It explains the case for VAT base broadening over rate increasing arguing that exemptions and zero rates mainly accrue benefits for higher income groups Even more persuasively it demonstrates that the net result of fiscal systems can be equalizing if the revenue of broad based VATs is used to finance in kind transfers such as healthcare and education VAT modernization should be used to enable governments to finance development Modernizing VATs in Africa puts a compelling case forward for how and why this can be achieved
