Chapter 5 Gross Income and Exclusions

SOLUTIONS MANUAL

Discussion Questions

- [LO 1] Based on the definition of gross income in §61 and related regulations, what is the general presumption regarding the taxability of income realized?

§61(a) defines gross income as all income from whatever source derived. Reg. §1.61-(a) provides further insight into the definition of gross income as follows: Gross income means all income from whatever source derived, unless excluded by law. Gross income includes income realized in any form, whether in money, property, or services. Thus, the general presumption regarding any income realized is that it is taxable, unless otherwise excluded by law.
- [LO 1] Based on the definition of gross income in §61, related regulations, and judicial rulings, what are the three criteria for recognizing taxable income?

Based on §61(a), Reg. §1.61-(a), and various judicial rulings, taxpayers recognize gross income when (1) they receive an economic benefit, (2) they realize the income, and (3) no tax provision allows them to exclude or defer the income from gross income for that year.
- [LO 1] Describe the concept of realization for tax purposes.

As indicated in Reg. §1.61-(a), the tax definition of income adopts the realization principle. Under this principle, income is realized when (1) a taxpayer engages in a transaction with

like Safe Harbour and Common Consolidated Corporate Tax Base CCCTB Taking into account the prominent role of SMEs in the European Union's economy the book also puts forward policy recommendations to achieve the long term goals of the EU's 2020 agenda

Introduction to Transfer Pricing Jerome Monsenego, 2022-11-22 Transfer pricing refers to the pricing of cross border intercompany transactions Transfer prices influence the tax base of multinational enterprises and thus also the fiscal revenues of the countries where they are doing business The importance of transfer pricing has significantly expanded over time and culminated with the work of the OECD on Base Erosion and Profit Shifting BEPS With the globalisation of business activities the need for States to prevent tax avoidance and the risk of double taxation faced by multinational enterprises transfer pricing has become a key question for multinational enterprises and tax administrations alike

Introduction to Transfer Pricing intends at providing a general introduction to the fundamentals of transfer pricing The book is focused on explanations of the principles that apply albeit to various extents in most countries Although the majority of these principles are provided by the OECD the views of other international organisations in particular the United Nations and the European Union are also taken into account Moreover the book illustrates the fundamentals of transfer pricing with concrete examples based on the structures often used by multinational enterprises when conducting cross border business activities Also included are relevant court cases from a variety of countries Among the issues and topics covered are the following the arm's length principle in theory and practice transfer pricing methods intercompany transactions involving intangibles and financial transactions common types of transfer pricing models cross border business restructurings the substance requirement for transfer pricing purposes attribution of profits to permanent establishments and the prevention and resolution of transfer pricing disputes This second edition was updated based on the 2022 OECD Transfer Pricing Guidelines and the 2021 UN Transfer Pricing Manual

Taxation in the Digital Economy Nella Hendriyetty, Chris Evans, Chul Ju Kim, Farhad Taghizadeh-Hesary, 2022-07-11 A robust and efficient tax administration in a modern tax system requires effective tax policies and legislation Policy frameworks should cover all aspects of tax administration and include the essential processes of capturing processing analyzing and responding to information provided by taxpayers and others concerning taxpayers affairs By far the greatest challenges facing tax administrations in all countries are those posed by the continuing developments in the digital economy Whereas societies are grappling to come to terms with the transitions from the third industrial or digital revolutions revenue authorities grapple with the consequences for the sustainability of their tax bases and the efficient administration and collection of taxes This book presents a critical review of the status of tax systems in Asia and the Pacific in the era of the digital economy The book suggests how countries can maximize their domestic resource mobilization when confronted by the challenges that digitalization inevitably produces as well as how they can best harness or take advantage of aspects of digitalization to serve their own needs The full implications of the COVID 19 crisis are still too uncertain to predict but it is clear that the crisis will accelerate the trend towards digitalization and also increase

pressures on public finances This in turn may shape the preference for and the nature of both multilateral and unilateral responses to the tax challenges posed by digitalization and the need to address them This book will be a timely reference for those researching on taxation in digital economy and for policy makers The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Formalisation Through Taxation Jonas Richter, 2019-10-09 In developing countries such as Paraguay informality remains a prevalent and persistent issue Many avoid formal registration with the authorities and evade tax payments However a growing academic literature argues for an interrelation between a broader tax base and a country's economic and democratic development A strand of this literature focuses on the means of taxing the informal sector and argues for positive revenue and growth effects This Palgrave Pivot analyses Paraguay's 2004 and 2012 tax reforms using both qualitative and quantitative data It illustrates that the country's personal income tax as well as other alterations in the tax system constitute an incentive and nudging mechanism that leads to a formalisation process of economic activity and consequently to a broader tax base Using interview and tax data the book demonstrates how the reform initiates a rising demand of formalised purchases from both customers and businesses It further suggests a potential way of how the taxpayers respond politically to the enhanced fiscal imperative

Transfer Pricing and Developing Economies Joel Cooper, Randall Fox, Jan Loeprick, Komal Mohindra, 2017-01-05 Recent years have seen unprecedented public scrutiny over the tax practices of Multinational Enterprise (MNE) groups Tax policy and administration concerning international transactions aggressive tax planning and tax avoidance have become an issue of extensive national and international debate in developed and developing countries alike Within this context transfer pricing historically a subject of limited specialist interest has attained name recognition amongst a broader global audience that is concerned with equitable fiscal policy and sustainable development Abusive transfer pricing practices are considered to pose major risk to the direct tax base of many countries and developing countries are particularly vulnerable because corporate tax tends to account for a larger share of their revenue This handbook is part of the wider WBG engagement in supporting countries with Domestic Resource Mobilization (DRM) by protecting their tax base and aims to cover all relevant aspects that have to be considered when introducing or strengthening transfer pricing regimes The handbook provides guidance on analytical steps that can be taken to understand a country's potential exposure to inappropriate transfer pricing transfer mispricing and outlines the main areas that require attention in the design and implementation of transfer pricing regimes A discussion of relevant aspects of the legislative process including the formulation of a transfer pricing policy and the role and content of administrative guidance is combined with the presentation of country examples on the practical application and implementation of the arm's length principle and on running an effective transfer pricing audit program Recognizing the importance of transfer pricing regulation and administration for the business environment and investor confidence this handbook aims to balance the general objective of

protecting a country's tax base and raising additional revenue with investment climate considerations wherever appropriate

Transfer Pricing and Value Creation Raffaele Petruzzi, Romero J.S. Tavares Esq., 2019-09-02 Value Creation and its effects on Transfer Pricing and tax law Emerging from the OECD G20 BEPS Project a new somewhat fuzzy notion of Value Creation came to permeate not only Transfer Pricing language but also wider allocation rules and anti abuse provisions in international tax law The notion of Value Creation reframes the interpretation and application of the Arm's Length Principle ALP that is embedded in Articles 7 and 9 of the OECD Model Convention This new Value Creation notion and approach assist in understanding key enterprise functions while different industry sectors manifest these concepts in various ways Situating such notions and this approach within the law of tax treaties and analyzing terms of the OECD Transfer Pricing Guidelines alongside their factual context is the aim of this book Here law students address Transfer Pricing and Value Creation in sectors as varied as commodities trade automotive consumer products food and beverages pharmaceutical and life sciences telecommunications and the key topic of value creation in a digitalized economy Our LL.M students were required to address issues not explored in legal research and to discuss factual topics relevant for Transfer Pricing All students focused on topics that are new to the international tax debate that keep evolving and on factual matters that often escape legal research

Special Features of the UN Model Convention Anna Binder, Viktoria Wöhrer, 2019-10-01 Detailed research on the UN Model Convention's unique features The UN Model Convention has a significant influence on international tax treaty practice and is especially used by emerging and developing countries as a starting point for treaty negotiations Driven by the aim to achieve consistency in the international tax treaty practice the structure and content is to a large extent similar in the UN Model and the OECD Model However whereas the OECD has historically focused its efforts on issues mainly relevant for developed countries the UN Tax Committee has continuously attempted to specifically take into account tax treaty policies for developing countries when drafting and amending the UN Model Convention Compared to the OECD Model Convention the UN Model Convention aims at giving more weight to the source principle Popular examples are the PE definition in the UN Model which provides for a lower threshold than Article 5 of the OECD Model or Article 12A on Fees for Technical Services which has been introduced with the latest amendment of the UN Model Convention 2017 and allows for a withholding tax to be levied on payments to non residents when the payer of the fee is a resident of that contracting State irrespective of where the services are provided Interestingly in the discussions of the tax challenges arising from the digitalization of the economy the OECD and the G20 are also exploring options to allocate more taxing rights to the jurisdiction of the customer and/or user i.e. the market jurisdictions As this has traditionally been the focus of the UN Model Convention its unique features and developing countries practices could be taken into account when exploring new nexus rules that are not constrained by the physical presence requirement This book contains the master's theses of the full time LL.M program 2018/2019 for which Special Features of the UN Model Convention has been chosen as the general topic With

this book the authors and editors do not aim at discussing each article of the UN Model Convention but rather focus on the unique features of the UN Model Convention which are explored in detail This is supplemented with an evaluation of the function and relevance of the UN Tax Committee in the international tax policy discussion and with an analysis of the influences of the OECD s BEPS project on the UN Model he OECD s BEPS project on the UN Model **ICEMME 2022** Nikolaos Freris,Qinghai Li,Harsh Kumar,2023-02-15 It is our great pleasure to have you at the 2022 4th International Conference on Economic Management and Model Engineering ICEMME 2022 which was held in Nanjing China from November 18th to 20th virtual event It is an international forum for academic communications between experts and scholars in the fields of economic management and model engineering The main objective of ICEMME 2022 is to provide a platform to deliberate latest developments and future directions in the fields of economic management and model engineering The conference provided opportunities for the delegates to exchange research ideas and scientific information and established business or research relations for all participants to find global partners for future collaboration **Popular Science** ,2007-05 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better **Monthly Catalog of United States Government Publications** ,1983 **Monthly Catalogue, United States Public Documents** ,1987-03 **Migration and Agriculture** Alessandra Corrado,Carlos de Castro,Domenico Perrotta,2016-07-28 In recent years Mediterranean agriculture has experienced important transformations which have led to new forms of labour and production and in particular to a surge in the recruitment of migrant labour The Mediterranean Basin represents a very interesting arena that is able to illustrate labour conditions and mobility the competition among different farming models and the consequences in terms of the proletarianization process food crisis and diet changes Migration and Agriculture brings together international contributors from across several disciplines to describe and analyse labour conditions and international migrations in relation to agri food restructuring processes This unique collection of articles connects migration issues with the proletarianization process and agrarian transitions that have affected Southern European as well as some Middle Eastern and Northern African countries in different ways The chapters present case studies from a range of territories in the Mediterranean Basin offering empirical data and theoretical analysis in order to grasp the complexity of the processes that are occurring This book offers a uniquely comprehensive overview of migrations territories and agro food production in this key region and will be an indispensable resource to scholars in migration studies rural sociology social geography and the political economy of agriculture Monthly Catalog of United States Government Publications United States.
