

Chapter 3. Configuration and Operation

3.1 Connecting Devices to the Switch

[Connection Guidelines]

- For 10BaseT connection : Category 3 or 5 twisted-pair Ethernet cable
- For 100BaseTX connection : Category 5 twisted-pair Ethernet cable
- For 1000BaseTX connection: Category 5e or 6 twisted-pair Ethernet cable
- For TX cable connection, always limit the cable distance to 100 meters (328 ft) as defined by IEEE specification
- If your switch has 1000BaseSX/1000BaseLX connections, you can connect long distance fiber optic cable to the switch.
- Because this switch supports Auto MDI/MDI-X detection on each TX port, you can use normal straight through cable for both workstation connection and hub/switch cascading.

3.2 Connecting to Another Ethernet Switch/Hub

This Switch can be connected to existing 10Mbps / 100Mbps / 1000Mbps hubs/switches. Because all TX ports on the Switch support Auto MDI/MDI-X function, you can connect them any TX port of the Switch to the MDI or MDI-X port of another hub/switch with Straight Through or Crossover cables. If the switches have fiber-optic ports, you can cascade them with fiber-optic cable.

Windows Configuration Book Answers Chapter 3
