

# Talyvel 5 Electronic Level

## Fast, Accurate and Versatile

Universally accepted as the best in their field, Taylor Hobson's Talyvel Electronic Level systems provide versatile and precise measurement for a wide variety of industrial, optical alignment (where used with Taylor Hobson Micro Alignment Telescopes), civil, marine and construction engineering applications. They combine exceptionally high accuracy, stability and repeatability with fast response and operational convenience.

Used for measuring straightness, flatness or absolute level, Talyvel 5 can also function as a comparator to detect departures from a preset attitude, which may not necessarily be level.

Incorporating its world renowned, compact, highly stable, pendulum transducer in the Level Unit and a rechargeable battery or mains powered Display Unit, Talyvel 5 provides rapid and simple reading of angle of tilt and measurement relative to gravity. It is simple to calibrate and operate, with a fast measurement response time.

The Talyvel's Level Unit can be positioned remotely from the Display Unit - for instance in hard to see or confined places with the Display Unit located where it can be easily read.

Measurement results from the basic Talyvel 5 system are displayed on a digital LCD screen. In addition, results can be recorded and analysed further by interfacing to a computer.

### Talyvel 5 Offers:

- Quick, accurate and simple setting to gravity, or measurement of level
- Fine  $\pm 10$  second range available on the built in analogue meter
