Taxation In The Netherlands:

Taxation in the Netherlands Gerrit te Spenke, Mark de Vries, 2011-01-01 The book summarizes the main features of the Netherlands tax system. It provides foreign investors and business people with basic information on the tax implications of their business plans in the Netherlands. The various chapters deal with the General Tax Act, individual income tax, corporate income tax, wage tax, the social security system, dividend withholding tax, VAT, estate tax, gift tax, transfer tax, insurance tax, international and European tax law.

Capital Income Taxation in the Netherlands Alexander Klemm, Mr. Shafik Hebous, 2021-05-20 This paper looks at capital income taxation in the Netherlands from an international and domestic perspective. The Netherlands is a major conduit country for FDI. Recent reforms taken by the Dutch authorities, as well as public statements, represent a strong move to address international tax avoidance, but it is too early to be able to detect the impact. In the data and measuring tax avoidance even in the past is fraught with difficulties. Domestically, the unique system which for many financial assets effectively taxes wealth rather than capital income leads to inequities and distortions. Owner-occupied housing is strongly tax-favored and in many cases effectively subsidized. Various reforms, not necessarily of a fundamental nature, would improve efficiency and equity.

Taxation of International Performing Artists Dick Molenaar, 2005 The special tax rules for performing artists lead to obstacles. This book considers the problems regarding, for example, the determination of taxable income and the non-deductibility of expenses and tax credits in the country of residence and gives clear examples of excessive taxation.

Taxation in the Netherlands Netherlands. Ministerie van Financiën, 1993 *Tax Planning with Holding Companies - Repatriation of US Profits from Europe* Rolf Eicke, 2009-01-01 The book deals with tax planning with holding companies located in Europe, Asia or the Caribbean. It analyses the problem of repatriating US profits from Europe, going far beyond the routing of income via different companies. Instead, the approach includes an analysis of the interdependencies between international tax competition, holding company regimes and tax planning concepts in order to establish a basis for tax planning measures regardless of the fast-changing legal environment for holding companies in the different countries.
