prominence in the literature of recent years The quality of such work has also improved and is now theoretically informed and based on rich data sets Work on finds over the last decade or two has changed our understanding of the Roman era in profound ways and yet despite such encouraging advances and such clear worth there has to date been little in the way of a dedicated forum for the presentation and evaluation of current approaches to the study of material culture The conference at which these papers were initially presented has gone some way to redressing this and these papers bring the very latest studies on Roman finds to a wider audience Twenty papers are here presented covering various themes

**Report of the Chief of the Bureau of Animal Industry, United States Department of Agriculture** United States. Bureau of Animal Industry,1896      The Bull Ring Uncovered Catharine Patrick,Stephanie Ratkai,2008-12-12 The excavations in the centre of Birmingham uncovered evidence of habitation from prehistoric and Roman times but the 12th to 19th centuries presented by far the most evidence from artefacts environmental samples and structural remains The medieval industrial past was of particular interest with tanning and the manufacture of hemp and linen all playing a large role in the city s prosperity Metal working reached its peak in the seventeenth century with brass founding becoming important from the eighteenth century onwards Most of the artefactual evidence attests to Birmingham s industrial past indeed the evidence for domestic life is comparatively scant with an anomalous burial of two people at Park Street presenting something of a mystery This volume presents insights into the early industrial past of this important city and is an invaluable record covering eight hundred years of occupation      Annual report of the Bureau of Animal Industry. v. 10/11, 1893/94 ,1896
