The Architectures Of Atelier Bow Wow:

Atelier Bow-Wow Atorie Wan,Laurent Stalder,2013 The Tokyo based architecture firm Atelier Bow Wow founded in 1992 by Yoshiharu Tsukamoto and Momoyo Kaijima is among the most admired architecture practices of today Part of a whole generation of Japanese firms that seized the recession of the early 1990s as an opportunity to develop a new design practice in response to changed planning and social conditions Atelier Bow Wow is well known for its domestic and cultural architecture as well as its research exploring micro architecture The firm s first studies focused on anonymous Tokyo buildings and highlighted the ways in which they met the requirements of residents and visitors Additionally founders Tsukamoto and Kaijima devised a particular type of residential building for Tokyo a small scale house that offers an ideal solution to the restrictions of the densely populated megacity This publication unifies Atelier Bow Wow s architectural and theoretical work

Architecture of Atelier Bow Wow Bow Wow Atelier,Terunobu Fujimori,2010-03-23 The first book to document the Tokyo based architectural firm one of the most innovative practices working today Achieving near cult status among architectural students around the world Yoshiharu Tsukamoto and Momoyo Kaijima of Atelier Bow Wow have built a career confronting the challenges posed by dense urban environments Their city houses enclosed in vibrant idiosyncratic forms are distinguished by their capacity to accommodate the changing needs of the occupants A basic feature is the permeability of interior spaces where public and the more intimate places co mingle often in vertical structures with a total floor area that rarely exceeds 200 square meters Atelier Bow Wow has a dedicated research division that has published a number of treatises on vernacular architecture This book will feature their newest research including plans as well as explorations on mobile or portable projects The book includes key projects such as the Mini House The Sway House the Juicy House House and Atelier Bow Wow the House Tower and the Aco House

Architectural Ethnography Jennifer Sigler,Leah Whitman-Salkin,2017 When Yoshi Tsukamoto and Momoyo Kaijima of the forward thinking Tokyo based architecture and design firm Atelier Bow Wow arrived at the Harvard University Graduate School of Design as guest professors in 2016 they challenged students to deeply consider their surroundings and record their reactions as a large pencil drawing In this public drawing time is suspended and expanded futures presents and pasts converge and the act of drawing becomes an instrument of dialogue and engagement The students unfolded their concept of an ecology of livelihood with shadowless figures objects and spaces that coexist with construction details explaining their belief in the behavioral capacities of humans architecture and nature Tsukamoto and Kaijima revealed the generosity of spirit in their work and the importance of pushing such capacities to their most yielding limits The Incidents publication series is based on events that occurred at the Harvard University Graduate School of Design between 1936 and tomorrow

The Fractal Dimension of Architecture Michael J. Ostwald,Josephine Vaughan,2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings

that have been designed by some of the twentieth century's most respected and celebrated architects including designs by Le Corbusier, Eileen Gray, Frank Lloyd Wright, Robert Venturi, Frank Gehry, Peter Eisenman, Richard Meier and Kazuyo Sejima amongst others. This book uses mathematics to analyse arguments and theories about some of the world's most famous designs. Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings, this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field. The data derived from this study is used to test three overarching hypotheses about social, stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture. Through this process, the book offers a unique mathematical insight into the history and theory of design.

Narrative Architecture Sylvain De Bleeckere, Sebastiaan Gerards, 2017-02-24 *Narrative Architecture* explores the postmodern concept of narrative architecture from four perspectives: thinking, imagining, educating and designing to give you an original view on our postmodern era and architectural culture. Authors Sylvain De Bleeckere and Sebastiaan Gerards outline the ideas of thinkers such as Edmund Husserl, Paul Ricoeur, Emmanuel Levinas and Peter Sloterdijk and explore important work of famous architects such as Daniel Libeskind and Frank Gehry as well as rather underestimated architects like Günther Behnisch and Sep Ruf. With more than 100 black and white images, this book will help you to adopt the design method in your own work.

Basics Architecture 03: Architectural Design Jane Anderson, 2017-09-07 *Basics Architecture 03: Architectural Design* explains the process of designing architectural projects. It describes the design studio and the activities that take place there. The architectural design process is as diverse as the people who practise it; all architects follow their own individual design process. In this dynamic new text, the realities of the design process and the relationship between education and practice are explored in detail. The book introduces a variety of processes through examples and case studies. This allows readers to identify with certain methods with which they could respond to in their own work and enables them to develop their own unique approach.

Japanese Modern Architecture 1920-2015 Ari Seligmann, 2016-11-30 *Japanese Modern Architecture 1920-2015* uses a series of thematic lenses to explain the rich history of Japanese architectural developments from the 1920s foundation of modern architecture to contemporary permutations of modern and post-modern architecture. The book introduces the diversity of Japanese architecture and traces the evolution of Japanese architecture in the context of domestic and international developments. It examines the relationship between architecture and nature and explores various approaches to craft and material. Finally, this new book considers tensions between refinement and ostentation in architectural expression. Of interest to students of architecture and anyone with an interest in Japanese post-war culture and superbly illustrated with 95 colour images.

Spatial Agency: Other Ways of Doing Architecture Nishat Awan, Tatjana Schneider, Jeremy Till, 2013-09-13 This book offers the first comprehensive overview of alternative approaches to architectural practice. At a time when many commentators are noting that alternative and richer

approaches to architectural practice are required if the profession is to flourish this book provides multiple examples from across the globe of how this has been achieved and how it might be achieved in the future Particularly pertinent in the current economic climate this book offers the reader new approaches to architectural practice in a changing world It makes essential reading for any architect aspiring or practicing *Design Research in Architecture* Murray Fraser,2021-07-28 What is the role of design research in the types of insight and knowledge that architects create That is the central question raised by this book It acts as the introductory overview for Ashgate's major new series Design Research in Architecture which has been created in order to establish a firm basis for this emerging field of investigation within architecture While there have been numerous architects scholars since the Renaissance who have relied upon the interplay of drawings models textual analysis intellectual ideas and cultural insights to scrutinise the discipline nonetheless until recently there has been a reluctance within architectural culture to acknowledge and accept the role of design research as part of the discourse However in many countries around the world one of the key changes in architecture and architectural education over the last decade has been the acceptance of design as a legitimate research area in its own right and this new series provides a forum where the best proponents of architectural design research can publish their work This volume provides a broad overview on design research that supports and amplifies the different volumes coming out in the book series It brings together leading architects and academics to discuss the more general issues involved in design research At the end there is an Indicative Bibliography which alludes to a long history of architectural books which can be seen as being in the spirit of design research

Ecological Urban Architecture Thomas Schröpfer,2012-12-13 The goal of advancing eco cities often remains confined to political or technological issues This book establishes a focus on architectural and infrastructural design approaches to sustainable urban development Taking as a basis the critical assessment of the five prototypical eco cities of Vauban Freiburg solarCity Linz Valdespartera Sarriguren Pamplona und Bo01 Malm the book identifies fields in which architectural and urban designers can use their creative skills and methods to achieve sustainable results on the urban scale The themes of Materialize Mobilize Simulate and Transform highlight the shift from the manipulation of quantitative variables to interactive relationships effecting qualitative outcomes in design For example Materialize explores the potential of eco design beyond the traditional palette of materials to show how spatial boundaries can be re imagined as gradients of conditioned versus unconditioned space working with climatic conditions rather than material boundaries to help generate new forms of urban architecture **A Critical History of Contemporary Architecture** Elie G. Haddad,David Rifkind,2016-12-05 1960 following as it did the last CIAM meeting signalled a turning point for the Modern Movement From then on architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi and gave rise to the first revisionary movement following Modernism Bringing together leading experts in the field this book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 It consists of two parts the first section providing a presentation of major

movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects **Landscape Is...!** Gareth Doherty, Charles Waldheim, 2025-02-24 Landscape Is examines the implicit biases and received meanings of landscape Following on from the previous publication Is Landscape which examined the plural and promiscuous identities of the landscape idea this companion volume reflects upon the diverse and multiple meanings of landscape as a discipline profession and medium This book is intended for academics researchers and students in landscape architecture and cognate disciplines Chapters address various overlooked aspects of landscape that develop disturb and diversify received understandings of the field Framed as an inquiry into the relationship of landscape to the forms of human subjectivity the book features contributions from leading voices who challenge the contemporary understandings of the field in relation to capital and class race and gender power and politics and more *Pragmatic Sustainability* Steven A. Moore, 2016-07-04 This second edition of Pragmatic Sustainability proposes a pragmatic discursive and pluralistic approach to thinking about sustainability Rather than suggesting a single solution to the problem of how to live sustainably this collection discusses broader approaches to social and environmental change Eight continuing authors and seven new ones adjust their dispositions toward rapidly changing and still unsustainable conditions forging agreements and disagreements on five overlapping themes the Grounds for Sustainability the critique of Technological Culture the need to conceive of Sustainability in Place in Cities finally asking how should we reimagine the fraught relationship between Civil Society Industry and Regulation Editor Steven A Moore asks how a set of ideas now more than a century old remains relevant A partial answer can be found in reconstructing the very modern ideas confronted by those who came to call themselves Pragmatists at the beginning of the twentieth century evolution ecology and design Moore argues that we have yet to develop dispositions in theory and practice that critically integrate these ideas into sustainable development In sum this new edition provides a fresh and hopeful look at the wicked problems deliberated by almost anyone engaged in adapting to the always changing conditions of the built world **Encounters and Positions** Susanne Kohte, Hubertus Adam, Daniel Hubert, 2017-03-20 Now as before Japanese architecture is very popular in Europe and the western world This publication provides an overview of its many design concepts and cross references Using design examples and interviews the book presents thirteen current positions The publication focuses on young architects who take up extremely independent positions within Japanese architecture as well as on Pritzker Prize winners Toyo Ito and Fumihiko Maki Six essays by European specialists on Japan provide supplementary insights into the aesthetics and space concepts of Japanese architecture making cross references to Japan s architectural history and explaining current lines of development The book thus combines a self reflective approach with an outsider s analytical view *Reading Architecture*

Angeliki Sioli, Yoonchun Jung, 2018-04-09 Why write instead of draw when it comes to architecture Why rely on literary pieces instead of architectural treatises and writings when it comes to the study of buildings and urban environments Why rely on literary techniques and accounts instead of architectural practices and analysis when it comes to academic research and educational projects Why trust authors and writers instead of sociologists or scientists when it comes to planning for the future of cities This book builds on the existing interdisciplinary bibliography on architecture and literature but prioritizes literature's capacity to talk about the lived experience of place and the premise that literary language can often express the inexpressible It sheds light on the importance of a literary instead of a pictorial imagination for architects and it looks into four contemporary architectural subjects through a wide variety of literary works Drawing on novels that engage cities from around the world the book reveals aspects of urban space to which other means of architectural representation are blind Whether through novels that employ historical buildings or sites interpreted through specific literary methods it suggests a range of methodologies for contemporary architectural academic research By exploring the power of narrative language in conveying the experience of lived space it discusses its potential for architectural design and pedagogy Questioning the massive architectural production of today's globalized capital driven world it turns to literature for ways to understand resist or suggest alternative paths for architectural practice Despite literature's fictional character the essays of this volume reveal true dimensions of and for places beyond their historical social and political reality dimensions of utmost importance for architects urban planners historians and theoreticians nowadays *POP-UP HOTEL REVOLUTION, the architectural innovation about to come in the hotel industry* Joseph Di Pasquale, Chiara Butta, Paola Zatti, 2015 WHICH IS MOVING PEOPLE OR ARCHITECTURE In an era where nomadism is the keyword that relates people to the rest of the world architecture is seeking for a concrete response to the recent needs result of the rise of mobility and worldwide travels The proposal of new modular structures for the hospitality market defines the tendency to think movable modular flexible

Atelier Bow-Wow Learning from Utzon Lise Juel, 2013 *Dwell*, 2009-02 At Dwell we're staging a minor revolution We think that it's possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines *Architecture's Appeal* Marc Neveu, Negin Djavaherian, 2015-02-11 This collection of previously unpublished essays from a diverse range of well known scholars and architects builds on the architectural tradition of phenomenological hermeneutics as developed by Dalibor Vesely and Joseph Rykwert and carried on by David Leatherbarrow Peter Carl and Alberto Perez Gomez Taking an interdisciplinary approach and drawing on ideas from beyond the architectural canon contributors including Kenneth Frampton David Leatherbarrow Juhani Pallasmaa Karsten Harries Steven Holl Indra Kagi McEwen Paul Emmons and Louise Pelletier offer new insights and perspectives on questions such as the following Given the recent fascination with all things

digital and novel what is the role of history and theory in contemporary architectural praxis Is authentic meaning possible in a technological environment that is so global and interconnected What is the nature and role of the architect in our shared modern world How can these questions inform a new model of architectural praxis Architecture's Appeal is a thought provoking book which will inspire further scholarly inquiry and act as a basis for discussion in the wider field as well as graduate seminars in architectural theory and history

Pyrotechnic Cities Liam Ross, 2022-06-24 This book explores the relationship between architecture government and fire It posits that through the question of fire safety standardisation building design comes to be both a problem for and a tool of government Through a close study of fire safety standards it demonstrates the shaping effect that architecture and the city have on the way we think about governing Opening with an investigation into the Grenfell Tower fire and the political actors who sought to enrol it in programmes of governmental reform before contextualising the research in current literature the book takes four city studies each beginning with a specific historic fire The 1654 Great Fire of Meirecki Edo the 1877 town fire of Lagos the 1911 Empire Palace Theatre fire Edinburgh and the 2001 World Trade Centre attack New York Each study identifies the governmental response to the fire safety standards and codes designed in its wake and how these new processes spread and change Drawing on the work of sociologists John Law and Anne Marie Mol and their concept of Fire Space it describes the way that architectural design through the medium of fire is an instrument of political agency Pyrotechnic Cities is a critical investigation into these political implications written for academics researchers and students in architectural history and theory infrastructure studies and governance
