## Using Histograms Gizmo Answers:

Teleconnect ,1983      Accurate Two-dimensional Histograms for Fast Approximate Answers to Queries on Real Data  
[microform] Hang T. A. (Hang Thi Anh) Pham,2004 It is highly desirable to be able to obtain quick yet accurate approximate answers to queries on large databases Although one dimensional histograms are widely used as a form of data summarization they fail to capture correlations between pairs of attributes and this may result in highly erroneous approximations In this thesis we experimentally study the accuracy of approximation of two dimensional histogram types in the context of real data We investigate the issues of histogram structure choices including the number of frequent values recorded in a histogram the attribute partitioning priority order and the dimension structure We further suggest heuristics that can select reasonably good histogram structure choices for different partitioning techniques and various types of data distributions We comparatively evaluate previously proposed histogram types and we propose the density based histogram partitioning technique that leads to more accurate approximations than prior histogram types for real data
