Ruppel's Manual of Pulmonary Function Testing - E-Book Carl Mottram, 2022-02-01 Selected for Doody's Core Titles 2024 in Respiratory Therapy Master pulmonary function testing procedures and prepare for PFT credentialing exams Ruppel's Manual of Pulmonary Function Testing 12th Edition provides comprehensive coverage of common pulmonary function tests

testing techniques and the pathophysiology that may be evaluated by each test. It also includes information on equipment measurement software reference values and quality assurance so you can develop the testing skills you need to find and assess lung abnormalities and conditions such as asthma, COPD, and emphysema. Written by Carl D. Mottram, a well-known expert in pulmonary function procedures, this bestselling guide helps you get accurate test results every time. Entry and Advanced Level objectives prepare you for success on the NBRC's Pulmonary Function Technologist credentialing examinations and follow the content guidelines of the CPFT and RPFT exam matrices from the National Board for Respiratory Care. How To boxes provide step-by-step guidelines to performing pulmonary function tests, taking the guesswork out of completing accurate and result-producing tests. Case studies provide problem-solving challenges for real-life patient scenarios, including each case history, PFT testing results, a technologist's comments, and questions and answers. PFT Tips highlight and reinforce the most important pulmonary function testing information in every chapter. Convenient study features include key terms, chapter outlines, learning objectives, chapter summary points, suggested readings, a glossary, and self-assessment questions. Authoritative, all in one resource eliminates the need to search for information in other sources. Criteria for acceptability and repeatability are included in each test section, as well as interpretive strategies to help you adhere to recognized testing standards.

Cardiac Rehabilitation Manual Josef Niebauer, 2017-02-13. This book fulfills the need for practical guidance among all professionals involved in the management of these patients: from residents and fellows of cardiology and internal medicine, surgical teams, physiotherapy professionals, critical care physicians, and family medicine practitioners. The thoroughly updated content takes into account recent developments in cardiac rehabilitation and incorporates practical advice on how to use guidelines in clinical practice. There will be one new chapter on patients with cardiac resynchronization therapy, and all the others will be updated to keep up to date with the guidelines and current practice. Cardiac rehabilitation is of key importance to ameliorate long-term morbidity and mortality resulting from cardiac diseases and events. However, much of the current literature is dense, unwelcoming, and academic in style and format. For those physicians understanding the scope of cardiac rehabilitation, there is a need to distill the guidelines and various management options available to them into a concise practical manual. Up until now, all references have looked at the general options, but there is a definite need to investigate the practicalities of individual patient groups.

Perceived Exertion Laboratory Manual Luke Haile, Michael Gallagher, Jr., Robert J. Robertson, 2014-11-07. This manual provides laboratory-based learning experiences in perceptually and psychosocially linked exercise assessment, prescription, and programming. The primary pedagogic outcome is the ability to use applied theory and practice in perceptual and psychosocial exercise assessment and program design to promote the adoption and maintenance of a physically active lifestyle, enhancing overall health and fitness. Perceptual and psychosocial variables are presented in individual stand-alone laboratory modules that can supplement existing curricula such as exercise and sport psychology, exercise physiology, exercise testing, and prescription.

and exercise training and conditioning In addition the complete modular set has a conceptual flow that allows its presentation as an entire laboratory based course The laboratory modules are divided into three primary units assessment theoretical constructs scales and procedures tests prescription self regulation performance and program evaluation The manual uses a unique format in which case studies are embedded in the conceptual flow of each lab module facilitating translation of laboratory results to real world application The manual concludes with a discussion of perceptually and psychosocially linked exercise prescription and programming applications in public health such as program monitoring and adherence
