What Do You Say After You Say Hello Eric Berne:

What Do You Say After You Say Hello? Eric Berne, 1972 As a psychiatrist Dr Berne found that each person in early childhood under the powerful influence of his parents writes his own script that will determine the general course of his life That script dictates what kind of person he will marry how many children he will have even what kind of bed he will die in Most of all it determines whether he will be a winner or a loser a spendthrift or a skinflint a tower of strength or a doomed alcoholic Some people says Berne have scripts that call for them to fail in their professions or to be repeatedly disappointed in love or to be chronic invalids Here he demonstrates how each life script gets written how it works and how each of us can break free of it to help us attain real autonomy and true fulfillment From publisher description

This comprehensive and accessible book charts the origins and development of the major non psychoanalytic fields in counselling and psychotherapy. Leading British and North American psychotherapists examine a range of approaches including person centred, transactional analysis, Gestalt, cognitive and behavioural therapy. They discuss how, why and where each approach came about and the context and influences under which it was formulated. They go on to survey the further development of theory and practice in each case, taking in the most significant trends and highlighting advances which are often not recognized or fully understood. Each approach is then brought firmly up to date with an overview of its current ideology and direction so that readers can relate its present day context to its historical background.
