

GROSS DOMESTIC PRODUCT

Total quantity of goods and services produced in a country by foreign and national factors of production at market prices.

Real GDP (Constant prices)

It eliminates the distortion of price variations or inflation. It shows the real increase in production.

Nominal GDP (Current prices)

There is a distortion because it includes both goods and prices, it lacks accuracy.

Economics in Two Lessons John Quiggin, 2021-04-13 Since 1946 Henry Hazlitt's bestselling *Economics in One Lesson* has popularized the belief that economics can be boiled down to one simple lesson market prices represent the true cost of everything But one lesson economics tells only half the story It can explain why markets often work so well but it can't explain why they often fail so badly or what we should do when they stumble Quiggin teaches both lessons offering an introduction to the key ideas behind the successes and failures of free markets He explains

why market prices often fail to reflect the full cost of our choices to society as a whole Two lesson economics means giving up the dogmatism of laissez faire as well as the reflexive assumption that any economic problem can be solved by government action since the right answer often involves a mixture of market forces and government policy But the payoff is huge understanding how markets actually work and what to do when they don't This book unlocks the essential issues at the heart of any economic question From publisher description

Long-term care financing: lessons for low- and middle-income settings. Brief 1. Drivers of the demand for long-term care World Health Organization,2024-02-02 This brief is part of a series about financing health and social long term care lessons for low and middle income countries LMICs The number of people aged 65 years and older will increase in LMICs where most older people will be living by 2050 Many people in LMICs will experience the onset of age related health problems before the age of 65 years Long term care LTC can include some acute care medical services delivered in health facilities but it primarily refers to support provided outside of the health system by caregivers in institutions or at home to allow people to maintain their routine activities Individuals unmet needs increase the demand for LTC Without formal LTC services and systems the costs of LTC shift to the family Informal caregivers primarily women may need to reduce their working hours or leave the labour force prematurely placing pressure on the economy and household resources The availability of informal caregivers has declined along with decreases in fertility and family sizes and increased opportunities for women in the formal workforce In the absence of formal LTC services and systems individuals seek care in the acute care medical system which can increase health care costs while offering suboptimal care for older adults People underestimate their need for LTC even though many may require intensive support or institutional care that may exceed their income Given the market failures of LTC insurance public intervention is well justified to meet this demand

Economic Lessons from the Transition: The Basic Theory Re-examined Daniel R. Kazmer,Michele Konrad,2016-09-16 Economic Lessons from the Transition focuses on major transitions in the 1990s the transition from central planning and communism to market capitalism and the global integration of national financial systems The transitions were supposed to raise most peoples standard of living instead they dramatically worsened the lives of most people in the countries involved While most attempts to explain this failure focus on policies the authors of this book argue that failure of economic theory to fully understand these transitions has led to bad policies that made the transitions unnecessarily painful and costly The book suggests answers to the following questions How should basic economic theory as taught in introductory economics courses be revised in light of the failure of market oriented economics to effect a successful transition in so many former communist economies Could the theory be revised and presented in a different manner How can basic economic theory be used to help explain the past failures in understanding transition problems and to avoid future mistakes This volume is a must read for all who teach economics or apply economics to the real world

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
