Cultural and Critical Explorations in Community Psychology Heather Macdonald, 2016-11-11 This book engages the practice of community based psychology through a critical lens in order in order to demonstrate that clinical practice and psychological assessment in particular require more affirmative psychopolitical agency in the face of racial injustice within the urban environment Macdonald includes examples of clinical case analyses vignettes and ethnographic descriptions while also drawing upon a cross fertilization of theoretical ideas and disciplines An oft neglected element of community psychology is the practice of community informed psychological assessment especially within the inner city environments This book uniquely suggests ideas for how clinical practice in relationship to issues such as race and cultural memory can serve as a substantial vehicle for social justice against the backdrop of a prejudiced criminal justice system and mental health delivery system

Handbook of Public Administration W. Bartley Hildreth, Gerald Miller, Evert L Lindquist, 2021-04-26 Public administration as a field of study finds itself in the middle of a fluid environment The very reach and complexity of public administration has been easy to take for granted easy to attack and difficult to explain particularly in the soundbite and Twitter snipe media environment Not only has the context for the discipline changed but the institutions of public administration have adapted and innovated to deliver services to the public and serve those in power while becoming increasingly complex themselves Has public administration evolved And what new lines of research are critical for effective policy and delivery of programs and public services while preserving foundational principles such as the rule of law and expert institutions This Handbook of Public Administration sheds light for new researchers doctoral students scholars and practitioners interested in probing modern public administration s role in solving major challenges facing nations and the world This fourth edition recognizes that the scholarship of public administration must reflect the diverse influence of an international orientation embracing public administration issues and practices in governance systems around the world and illustrating just how practice can vary across jurisdictions Every section identifies foundational principles and issues shows variation in practice across selected jurisdictions and identifies promising avenues for research Each chapter revisits enduring themes and tensions showing how

they persist along with new challenges and opportunities presented by digital technology and contemporary political realities The Handbook of Public Administration Fourth Edition provides a compelling introduction to and depiction of the contemporary realities of public administration and it will inspire new avenues of inquiry for the next generation of public administration researchers

Networks of Knowledge Production in Sudan Sondra Hale, Gada Kadoda, 2016-09-14 This is the first book of its kind on Sudan and arguably one of the first in North Africa We are part of an emerging more cosmopolitan approach that calls for a reassessment of ideas about not only the concept of identities but also about migration and technology especially social media Our essayists engage in redefinitions the broadening of our key variables the linking and intersecting of concepts and the investigations of methods and ethics and opt for an approach that is at once culturally specific to Sudan one of the most fluid social landscapes in the world and transnational Our essays address the narrowness of studies of migration and note the

almost total neglect in the broader Sudan literature of the rise of technology mobile telephony and social media in particular Furthermore our essayists address the near neglect in the Sudan literature of certain categories of people such as youth or certain diverse spaces such as neighborhoods or gold mines We have also been attempting to move away from the nearly stereotypic descriptions of Sudan to deal with topics that align Sudan with transnational issues and themes knowledge production among them This multidisciplinary collection of essays is the first comprehensive work to grapple explicitly with the question of knowledge production in such a diverse social landscape We discuss the impact of current trends in information technology and contemporary forms of identity and mobility on knowledge production These issues are pertinent for different sectors such as academia government or business and as we demonstrate reveal a myriad of possibilities for studying diverse population groups like youth women diaspora or specific political contexts such as conflict or oppression

Ethics Across the Curriculum—Pedagogical Perspectives Elaine E. Englehardt, Michael S. Pritchard, 2018-05-08

This book features articles by more than twenty experienced teachers of ethics who are committed to the idea that ethics can and should be taught virtually anywhere in the education curriculum They explore a variety of ways in which this might best be done Traditionally confined largely to programs in philosophy and religion the teaching of ethics has in recent decades spread across the curriculum education The contributors to this book discuss the rationale for supporting such efforts the variety of challenges these efforts face and the sorts of benefits faculty and students who participate in ethics across the curriculum endeavors can expect An overriding theme of this book is that the teaching of ethics should not be restricted to one or two courses in philosophy or religion programs but rather be addressed wherever relevant anywhere in the curriculum For example accredited engineering programs are expected to ensure that their students are introduced to the ethical dimensions of engineering This can involve consideration of ethical issues within particular areas of engineering e g civil mechanical electrical chemical as distinctive segments of certain courses e g those that focus on design problems or as a full semester course in ethics in engineering Similar approaches can be taken in nursing medicine law social work psychology accountancy management and so on That is some emphasis on ethics can be expected to be found in broad range of academic disciplines However many ethical issues require careful attention from the perspectives of several disciplines at once and in ways that require their joining hands Recognizing that adequately addressing many ethical issues may require the inclusion of perspectives from a variety of disciplines makes apparent the need for effective communication and

reflection across disciplines not simply within them This in turn suggests that faculty and their students can benefit from special programs that are designed to include participants from a variety of disciplines Such programs will be a central feature of this book Although some differences might arise in how such issues might best be discussed across different parts of the curriculum these discussions might be joined in ways that help students faculty administrators and the wider public better appreciate their shared ethical ground
