To Cast Out Disease John Farley, 2003-10-16 Though one of the most important public health agencies of the 20th century and the most powerful and richest branch of the Rockefeller

Foundation the International Health Division's history 1913-1951 has never been told before. This original work is based on a vast multitude of letters, reports, and photographs the author uncovered in the Rockefeller Archives. Farley describes the internal struggles and the conflicts with foreign and US governments of the medical barons who ran the organization as they set its goals and tried to eradicate some of the world's most serious diseases. He also describes the first testing of DDT and the preparation for the US army of a yellow fever vaccine that turned out to be contaminated. He takes the reader into the often byzantine world where the organization endowed schools of public health and nursing in such diverse places as London, Toronto, fascist Rome, militaristic Tokyo, and Calcutta in the dying days of the British Raj. Farley enlivens the book with sketches of the personalities and prejudices of those who worked in the Division and of the scandals that rocked it from time to time. He shows that in the continuing debate between those who believe that disease is the root cause of ill health and poverty and those who see poverty as the primary cause, the Division remained firmly in the former position. He also shows that after it closed, former members exerted considerable influence on the development of the World Health Organization. Opposing some recent historians, Farley argues against the view that the Health Division served as an advance guard for American capitalism. His lively book will be welcomed by all who are interested in the history of public health, tropical disease, and medical institutions.

Medicine and the Ethics of Care Diana Fritz Cates, Paul Lauritzen, 2002-03-01 In these essays a diverse group of ethicists draw insights from both religious and feminist scholarship in order to propose creative new approaches to the ethics of medical care While traditional ethics emphasizes rules justice and fairness the contributors to this volume embrace an ethics of care which regards emotional engagement in the lives of others as basic to discerning what we ought to do on their behalf The essays reflect on the three related themes community narrative and emotion They argue for the need to understand patients and caregivers alike as moral agents who are embedded in multiple communities who seek to attain or promote healing partly through the medium of storytelling and who do so by cultivating good emotional habits A thought provoking contribution to a field that has long been dominated by an ethics of principle Medicine and the
