School Science Practical Work in Africa Umesh Ramnarain, 2020-06-01 School Science

Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry based learning which signals a definite paradigm shift from the traditional teacher dominated to a learner centered approach. The book provides empirical research on approaches to practical work contextual factors in the enactment of practical work and professional development in teaching practical work. This book will be of great interest to academics, researchers and post graduate students in the fields of science education and educational policy.

Climate Change and Tourism in Southern Africa Jarkko Saarinen, Jennifer Fitchett, Gijsbert Hoogendoorn, 2022-03-30. This book explores the nature of climate change in southern Africa, its impacts on tourism and the resilience, adaptation and governance needs in various tourism operations and environments. Previous studies on climate change and tourism have mainly focused on the Global North and specific forms of tourism such as snow based winter activities. Drawing on case studies from a wide range of countries including South Africa, Lesotho, Namibia, Botswana and Zimbabwe, this book fills this lacuna by describing and analysing the climate change and tourism nexus in the southern African context. The book begins by providing an overview of the current and estimated impacts of climate change to the tourism industry in the region, highlighting the deepening socio-economic inequities and environmental and social injustices. It focuses on the importance of sustainable tourism in tackling these issues and highlights that resilience and robust governance and policy systems are essential for a tourism destination to successfully adapt to change. By synthesising the key lessons learned through this analysis, *Climate Change and Tourism in Southern Africa* also draws attention to specific adaptation and policy strategies which have value for other regions in the Global South. This book will be of great interest to students and scholars of climate change, tourism and environmental policy and justice.

Minding the Gap Pamela Aall, Chester A. Crocker, 2016-10-17. The prevailing narrative on Africa is that it is awash with violent conflict. Indeed, it does suffer from a multitude of conflicts, from border skirmishes to civil wars to terrorist attacks. Conflicts in Africa are diverse and complex, but there have been a number of cases of successful conflict management and resolution. What accounts for the successes and failures and what can we learn from Africa's experience? *Minding the Gap: African Conflict Management in a Time of Change* takes on these questions, bringing together more than 20 experts to examine the source of conflicts in Africa and assess African management capacity in the face of these conflicts.

Food Borne Pathogens and Antibiotic Resistance Om V. Singh, 2016-11-10. Food is an essential means for humans and other animals to acquire the necessary elements needed for survival. However, it is also a transport vehicle for foodborne pathogens which can pose great threats to human health. Use of antibiotics has been enhanced in the human health system, however, selective pressure among bacteria allows the

development for antibiotic resistance Foodborne Pathogens and Antibiotic Resistance bridges technological gaps focusing on critical aspects of foodborne pathogen detection and mechanisms regulating antibiotic resistance that are relevant to human health and foodborne illnesses This groundbreaking guide Introduces the microbial presence on variety of food items for human and animal consumption Provides the detection strategies to screen and identify the variety of food pathogens in addition to reviews the literature Provides microbial molecular mechanism of food spoilage along with molecular mechanism of microorganisms acquiring antibiotic resistance in food Discusses systems biology of food borne pathogens in terms of detection and food spoilage Discusses FDA s regulations and Hazard Analysis and Critical Control Point HACCP towards challenges and possibilities of developing global food safety Foodborne Pathogens and Antibiotic Resistance is an immensely useful resource for graduate students and researchers in the food science food microbiology microbiology and industrial biotechnology

through a one health approach in resource poor settings Bassirou Bonfoh, Katharina Sophia Kreppel, Hung Nguyen-Viet, Guillaume Fournié, Barbara Wieland, 2023-01-17 *Infrastructures for Peace in Sub-Saharan Africa* Mediel Hove, Geoff Harris, 2019-06-14 Cultures of violence are characteristic of many countries in sub Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual And yet the wide variations in levels of violence within and between countries show that it is not inevitable rather it is the result of choices made at individual community and societal levels This book examines the potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace Peace infrastructures vary hugely in sophistication and level The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations peace committees which serve local communities peace education and peace club programmes in schools mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non government efforts in peacemaking and peacebuilding The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace 1 It is the only book available which documents the experience and potential of nonviolence in post independence sub Saharan Africa 2 It makes a persuasive case for the development of various peace infrastructures in order to make peace sustainable 3 It explains how strategic planning can be utilised both to bring about change and to institutionalise it State, Land and Democracy in Southern Africa Arrigo Pallotti, Corrado Tornimbeni, 2016-03-03 Each country in southern Africa has a unique history but in all of them socio economic inequalities and high poverty levels weaken the governments legitimacy and represent a challenge to models of economic development One key issue appears to be the solution of the land question This vital concern affects both citizenship and democracy in the political systems of the region yet no government has shown the capacity or commitment to solve it In this volume leading European American and African scholars explore in detail the relationship between state land and democracy They examine the historical background of asset allocation and its impact on questions of nationality the definition of citizenship human rights and the current political and economic processes in southern Africa **Turning Promises Into Action**, 2018 More than two years into the life of the 2030 Agenda for Sustainable Development this report calls for dramatic advances in statistics financing and policies for gender equality as well as more determined steps towards democratic governance and accountability Based on robust data and expert analysis the report takes stock of where we stand on key aspects of gender equality globally tells us what is needed to monitor progress meaningfully and provides wideranging recommendations for change **From climate risk to resilience: Unpacking the economic impacts of climate change in Mozambique** Detelinova, Iva, Thomas, Timothy S., Tian, Junyan, Hammond, Wole, Arndt, Channing, 2023-11-13 Mozambique is already vulnerable to extreme weather events and climate change is projected to exacerbate their frequency and intensity The occurrence of cyclones and flooding has increased in recent years and the trend is expected to continue The country s coast where 60 percent of the population the

three biggest cities and critical infrastructure are situated is most exposed to climate change related risks including damage from cyclones and projected sea level rise. Densely populated and low lying regions such as Zambezia, Nampula, Sofala and Maputo Provinces are particularly exposed to risks from flooding. More broadly, climate change is projected to increase average temperatures across the country and to result in higher variability in precipitation, especially in the south. The most critical economic sectors vulnerable to climate change in Mozambique are agriculture, transport and potentially energy. In agriculture, maize is likely to be the most affected key crop. This can pose risks to food security alongside expected higher food inflation because of climate change, given maize's widespread cultivation and role in nutrition. The impact on other crops is likely to be more limited and to a large extent driven by damages from increased frequency of extreme weather events. This could exacerbate challenges in the sector which is already constrained by low productivity and limited arable areas. That said, climate change could create some opportunities; for example, rice yields are projected to improve. Most studies project agricultural production in the central region to be most adversely affected by climate change, albeit the impact varies by crop and within regions. Mozambique's transport infrastructure is highly vulnerable to climate change due to the projected increase in flooding, the low proportion of paved roads, their limited interconnectivity and the vulnerability of ports to cyclones and storm surges. Damages to Mozambique's transport sector are likely to have knock on effects to other sectors and can have significant regional implications as the country serves as a conduit for landlocked neighboring countries. Infrastructure damages alongside the projected coastal erosion may severely affect the tourism sector. Furthermore, Mozambique's high dependence on hydropower exposes it to losses from rainfall variability which is expected to increase. The country's largest hydropower plant is located downstream on the Zambezi River which various studies project to dry up due to climate change. Increased water use in upstream countries such as because of greater irrigation needs and in response to growing populations could also pose risks to Mozambique's hydropower sector.

National extension policy and state-level implementation: The case of Cross River State, Nigeria Ogunniyi, Adebayo, Babu, Suresh Chandra, Balana, Bedru, Andam, Kwaw S., 2020-07-15. Agricultural extension plays a number of important roles in the growth and transformation of the agricultural sector including improving agricultural productivity and food security and reducing hunger and malnutrition. Extension programs and interventions that will achieve significant impacts in terms of behavior and practice changes as well as agricultural productivity increase will succeed as a result of suitable policy formulation and an effective implementation process. Ultimately, agricultural extension reform requires policy vision and determination and a state level strategy that can be implemented. This paper documents issues, challenges, constraints and potential solutions and opportunities in implementing the national extension policy (NEP) at the state level in Nigeria using Cross River State as a case study. We use both quantitative and qualitative methods in the form of descriptive statistical analysis and an inclusive consultative process with a focus on the multistakeholder participatory model respectively. The descriptive results show that

generally there is low access to agricultural extension service across commodities and their respective value chains in Cross River State. We also document interesting insights from the multistakeholder consultative process. We find that collaboration and partnership between private and public extension service providers is key to developing a sustainable extension advisory and support service in Cross River State. We also found that coordination and standardization of the activities of the extension service providers is a way to avoid pollution of the agricultural innovation system in the state. Funding of extension services is another important factor affecting the effective implementation of the NEP. We therefore suggest that agricultural extension services can be funded through decentralization, involvement of farmers' associations and nongovernmental organizations, contracting out of extension services, public-private partnerships, privatization and embedding advisory services in other types of contracts. The results of this study further validate our approach of using multistakeholder engagement at the state level as an effective and insightful method of implementing the NEP at the state level.
