

HEAR vs. LISTEN

HEAR (no effort)

A sound/noise comes into your ear without you making an effort.

- You do not make conscious decision to hear.
- You physically experience the sense of sound.
- Sometimes the sound you hear is sudden or unexpected like a noise, an alarm or an explosion.

Examples:

- Did you hear that noise?
- I can't hear anything because of the loud music.
- I've heard that song before.

LISTEN (effort)

When you pay attention and try to listen to sounds

- You make decision to listen
- You deliberately pay attention to the sound.
- Listen + to + object(something)

Examples:

- Are you listening to me?
- I love listening to music.
- I tried to listen but I couldn't hear anything.

Compare: You can **hear** somebody talking but you need to **listen** to them to understand what they are saying.

Music in Contemporary Philosophy Martin Scherzinger, 2016-01-08 This book examines the functional place of music in contemporary European philosophy of the 20th and 21st centuries The chapters explore the musical dimensions of lesser known figures as well as well known philosophical figures in relation to their lesser known musical dimensions Edmund Husserl Martin Heidegger Jean Fran ois Lyotard Jacques Ranci re and Alain Badiou for example are central figures in debates concerning phenomenology postmodernism and political philosophy Their musical writings however have been largely overlooked Of those discussed here whose musical writings have gained some currency Ernst Bloch Theodor W Adorno Jean Luc Nancy Edward Said and Slavoj i ek music mostly constitutes but a partial aspect of their overall

philosophical output These chapters attempt to supplement the gap raising more prominently than hitherto the question concerning music in this philosophical milieu The collection represents some of the distinctive recent work of an emerging generation of American based music scholars tackling the relationship between philosophy and music in a qualitatively new way While this intellectual output cannot be easily summarized one detects certain features If what was once called New Musicology in the 1990s can be characterized by a turn to literary theory and philosophy treated as sources of mostly nonjudgmental inspiration we find here instead a new body of work that turns the tables on the relation between music and philosophy Instead of bringing philosophy to musicology this work critically analyzes how music inhabits philosophy itself and then assesses the ethical and political dimensions of these philosophical positions and their relation to lived history This book was originally published as a special issue of Contemporary Music Review
