Acts of Compassion in Greek Tragic Drama James Franklin Johnson, 2016-10-19 The ability of human beings to feel compassion or empathy for one another and express that emotion by offering comfort or assistance is an important antidote to violence and aggression In ancient Greece the epics of Homer and the tragic dramas performed each spring in the Theater of Dionysus offered citizens valuable lessons concerning the necessity and proper application of compassionate action This book is the first full length examination of compassion *eleos* or *oiktos* in Greek as a dramatic theme in ancient Greek literature Through careful textual analysis James F Johnson surveys the treatment of compassion in the epics of Homer especially the Iliad and in the works of the three great Athenian tragedians Aischylos Euripides and Sophokles He emphasizes reciprocity reverence and retribution as defining features of Greek compassion during the Homeric and Archaic periods In framing his analysis Johnson distinguishes compassion from pity Whereas in English the word pity suggests an attitude of superiority toward the sufferer the word compassion has a more positive connotation and implies equality in status between subject and object Although scholars have conventionally translated *eleos* and *oiktos* as pity Johnson argues that our modern day notion of compassion comes closest to encompassing the meaning of those two Greek words Beginning with Homer *eleos* normally denotes an emotion that entails action of some sort whereas *oiktos* usually refers to the emotion itself Johnson also draws associations between compassion and the concepts of fear and pity which Aristotle famously attributed to tragedy Because the Athenian plays are tragedies

they mainly show the disastrous consequences of a world where compassion falls short At the same time they offer glimpses into a world where compassion can generate a more beneficial and therefore more hopeful outcome Their message resonates with today's readers as much as it did for fifth century Athenians *Oxford Studies in Normative Ethics, Vol 7* Mark Timmons, 2017 OSNE is an annual forum for new work in normative ethical theory Leading philosophers advance our understanding of a wide range of moral issues and positions from analysis of competing normative theories to questions of how we should act and live well OSNE will be an essential resource for scholars and students working in moral philosophy

Emotion and Virtue Gopal Sreenivasan, 2020-11-24 A novel approach to the crucial role emotion plays in virtuous action What must a person be like to possess a virtue in full measure What sort of psychological constitution does one need to be an exemplar of compassion say or of courage Focusing on these two examples Emotion and Virtue ingeniously argues that certain emotion traits play an indispensable role in virtue With exemplars of compassion for instance this role is played by a modified sympathy trait which is central to enabling these exemplars to be reliably correct judges of the compassionate thing to do in various practical situations Indeed according to Gopal Sreenivasan the virtue of compassion is in a sense a modified sympathy trait just as courage is a modified fear trait While he upholds the traditional definition of virtue as a species of character trait Sreenivasan discards other traditional precepts For example he rejects the unity of the virtues and raises new questions about when virtue should be taught Unlike orthodox virtue ethics moreover his account does not aspire to rival consequentialism and deontology Instead Sreenivasan repudiates the ambitions of virtue imperialism Emotion and Virtue makes significant contributions to moral psychology and the theory of virtue alike The Science of Compassionate Love Beverley Fehr, Susan Sprecher, Lynn G. Professional Ethics Education: Studies in Compassionate Empathy Bruce Maxwell,2008-04-01 1 1 Practical Ethics Education at an Impasse Why is some practical ethics training a requirement of nearly all programmes in higher education The short answer is that it is thought to be conducive to ethical decision making and ethical behaviour In recent years the received idea that competency in moral reasoning implies moral responsibility on the ground has been the subject of critical attention Today researchers in moral education widely regard moral reasoning as but one among at least four dimensions of moral development alongside moral motivation moral character and moral sensitivity Rest 1986 Reflecting these changes educationalists in the diverse fields of medicine education business and applied ethics can now be found openly questioning how to take practical ethics education beyond the development of skills in moral reasoning Frequently topping the list of suggested improvements is to provide support for empathic capacities of response This work gives this proposal the systematic attention that it deserves Contemporary applied ethics and by extension practical and professional ethics education can be considered an offshoot of the broad philosophical doctrine of moral realism Moral realism takes many forms but in broad outline it is an established meta ethical position that emerged as a seemingly attractive alternative to another family of established philosophical positions that sometimes goes under the name of expressivism
