Insights 1 I was born in 1947 which was before the diagnosis of autism was established My mother took me to a neurologist who diagnosed me with brain damage She then took me to a speech therapist who made me hear sounds and taught me how to eat and talk 2 The diagnosis of autism has been confusing and variable over the years It is based on observing and evaluating behaviors which are subjective It is unclear if the symptoms are biological or psychological 3 When Kanner looked at the effects of autism he might have originally told himself that they were possibly biological in nature but he nonetheless wound up seeking a psychological cause When he speculated on what villains might have inflicted the psychic injury he rounded up psychoanalysis s usual suspects the parents 4 The idea that bad behavior is the result of poor parenting was popularized by psychiatrist Leo Kanner but it was actually the opposite that true poor parenting caused the child to behave badly
