**Soil Vapor Extraction Using Radio Frequency Heating** Donald F. Lowe, Carroll L. Oubre, C. H. Ward, 2023-05-31 One of the most widely used techniques for treating soils contaminated with volatile organic compounds soil vapor extraction SVE can also be applied to semi volatile organic compounds SVOCs if the soil is heated by applying electromagnetic energy in the radio frequency FR range to increase the vapor pressure of the contaminants Although RF SVE systems used in previous field demonstrations have had varying degrees of success questions remain concerning its viability and cost effectiveness Soil Vapor Extraction Using Radio Frequency Heating Resource Manual and Technology Demonstration covers detailed scientific and engineering information that answers these questions The book includes the necessary databases equations and example calculations for RF heating The theoretical and practical information included will facilitate future testing of RF SVE treatment of soils Additionally the book provides information for a full scale engineering design of potential RF SVE applications The authors use this information to examine predicted performance magnitude of costs and modifications to the design that may decrease cost Soil Vapor Extraction Using Radio Frequency Heating Resource Manual and Technology Demonstration gives an economic analysis of this innovative technology and considers other possible applications for it

**Radiation and Scattering from Large Polygonal Cylinders, Transverse Electric Fields** Joseph R. Mautz, 1975 The report deals with the computation of radiation and scattering of electromagnetic fields by electrically large convex conducting cylinders A general computer program is developed for the case of transverse electric fields using the geometrical theory of diffraction For a check of the computational accuracy a computer program for a moment solution to the H field integral equation is also developed Illustrative computations are made for examples of radiation from a line source of magnetic current in the vicinity of a polygonal cylinder scattering of plane waves radiation from slots and radiation from electric dipoles Also given are examples of computations for conducting strips grazing incidence on polygonal cylinders and scattering from small cylinders Complete program listings are included with program descriptions instructions for using and sample input output data *Introduction to Microwave Imaging* Natalia K.
