To Be Human:

What It Means to be Human Joanna Bourke, 2013-07-23 In 1872 a woman known only as An Earnest Englishwoman published a letter titled Are Women Animals in which she protested against the fact that women were not treated as fully human In fact their status was worse than that of animals regulations prohibiting cruelty against dogs horses and cattle were significantly more punitive than laws against cruelty to women The Earnest Englishwoman's heartfelt cry was for women to become animal in order to gain the status that they were denied on the grounds that they were not part of mankind In this fascinating account Joanna Bourke addresses the profound question of what it means to be human rather than animal How are people excluded from political personhood How does one become entitled to rights The distinction between the two concepts is a blurred line permanently under construction If the Earnest Englishwoman had been capable of looking 100 years into the future she might have wondered about the human status of chimeras or the ethics of stem cell research Political disclosures and scientific advances have been re locating the human animal border at an alarming speed In this meticulously researched illuminating book Bourke explores the legacy of more than two centuries and looks forward into what the future might hold for humans women and animals

Human in the Digital Economy Nicholas Agar, 2019-03-12 An argument in favor of finding a place for humans and humanness in the future digital economy In the digital economy accountants baristas and cashiers can be automated out of employment so can surgeons airline pilots and cab drivers Machines will be able to do these jobs more efficiently accurately and inexpensively But Nicholas Agar warns in this provocative book these developments could result in a radically disempowered humanity The digital revolution has brought us new gadgets and new things to do with them The digital revolution also brings the digital economy with machines capable of doing humans jobs Agar explains that developments in artificial intelligence enable computers to take over not just routine tasks but also the kind of mind work that previously relied on human intellect and that this threatens human agency The solution Agar argues is a hybrid social digital economy The key value of the digital economy is efficiency The key value of the social economy is humanness A social economy would be centered on connections between human minds We should reject some digital automation because machines will always be poor substitutes for humans in roles that involve direct contact with other humans A machine can count out pills and pour out coffee but we want our nurses and baristas to have minds like ours In a hybrid social digital economy people do the jobs for which feelings matter and machines take on data intensive work But humans will have to insist on their relevance in a digital age (Un)Learning to Be Human?
