Construction Manager-at-risk Project Delivery for Highway Programs Douglas D. Gransberg, Jennifer Sue Shane, 2010 TRB's National Cooperative Highway Research Program NCHRP Synthesis 402 Construction Manager at Risk Project Delivery for Highway Programs explores current methods in which state departments of transportation and other public engineering agencies are applying construction manager at risk CMR project delivery to their construction projects CMR project delivery is an integrated team approach to the planning design and construction of a highway project to help control schedule and budget and to help ensure quality for the project owner The team consists of the owner the designer who might be an in house engineer and the at risk construction manager The goal of this project delivery method is to engage at risk construction expertise early in the design process to enhance constructability manage risk and facilitate concurrent execution of design and construction without the owner relinquishing control over the details of design as it would in a design build project

Handbook of Survey Methodology for the Social Sciences Lior Gideon, 2012-06-21 Surveys enjoy great ubiquity among data collection methods in social research they are flexible in questioning techniques in the amount of questions asked in the topics covered and in the various ways of interactions with respondents Surveys are also the preferred method by many researchers in the social sciences due to their ability to provide quick profiles and results Because they are so commonly used and fairly easy to administer surveys are often thought to be easily thrown together But designing an effective survey that yields reliable and valid results takes more than merely asking questions and waiting for the answers to arrive Geared to the non statistician the Handbook of Survey Methodology in Social Sciences addresses issues throughout all phases of survey design and implementation Chapters examine the major survey methods of data collection providing expert guidelines for asking targeted questions improving accuracy and quality of responses while reducing sampling and non sampling bias Relying on the Total Survey Error theory various issues of both sampling and non sampling sources of error are explored and discussed By covering all aspects of the topic the Handbook is suited to readers taking their first steps in survey methodology as well as to those already involved in survey design and execution and to those currently in training Featured in the Handbook The Total Survey Error sampling and non sampling errors Survey sampling techniques The art of question phrasing Techniques for increasing response rates A question of ethics what is allowed in survey research Survey design face to face phone mail e mail online computer assisted Dealing with sensitive issues in surveys Demographics of respondents implications for future survey research Dealing with nonresponse and nonresponse bias The Handbook of Survey Methodology in Social Sciences offers how to clarity for researchers in the social and behavioral sciences and related disciplines including sociology criminology criminal justice social psychology education
