Corpora in the Foreign Language Classroom, 2015-07-14 The papers published in this volume were originally presented at the Sixth International Conference on Teaching and Language Corpora 4-7 July 2004 Granada Spain and reflect the latest developments that have taken place in the field of the teaching applications of text corpora with a special emphasis on their use in the foreign language classroom The book is divided into three main sections The first section sets the scene for what this collection of essays aims to be It deals with the issue of what corpus linguistics can do not only for the understanding of the nature of language itself but also for so fundamental and miraculous a matter such as language learning and language acquisition The second section tackles the issues of corpus design and corpus exploitation and provides the reader with a great variety of evidence in favour of corpora exploitation for the building of a successful teaching environment The final section deals with practical applications of corpora in the foreign language classroom Although each of the papers here reports particular experiences in very different teaching and learning contexts as a whole they show that corpora can be used on the spot in a language teaching context by teachers and learners without extensive training in computational tools and studies of linguistics features can be tailored to specific pedagogic context and learning requirements The book represents a solid contribution to linguistic studies and language teaching and it is a good example of the diversity of the scientific lines in which corpus linguistics is involved at the present moment

Hope, 1986 **Modern Language Teaching**, 1908 *Lessons from Good Language Teachers* Carol Griffiths, Zia Tajeddin, 2020-04-30 What makes a good language teacher This up to date practical book addresses that question from a human perspective recognising that teachers are not just machines but have feelings needs and identities of their own As the twenty two topics of the chapters in this volume clearly indicate language teachers are complex individuals who are expected to have a range of personal qualities to be able to satisfy the needs of their students and to have the knowledge and skills to provide instruction in a range of language areas Not only that but all of these requirements are constantly changing The authors present new insights from the real teaching environment that will be an invaluable help to language teachers at all stages of professional development **The English Language Volume 2 Essays by Linguistics and Men of Letters 1858-1964** , *The Multilingual Turn* Stephen May, 2013-07-24 Drawing on the latest developments in bilingual and multilingual research The Multilingual Turn offers a critique of and alternative to still dominant monolingual theories pedagogies and practices in SLA TESOL and bilingual education Critics of the monolingual bias argue that notions such as the idealized native speaker and related concepts of interlanguage language competence and fossilization have framed these fields inextricably in relation to monolingual speaker norms In contrast these critics advocate an approach that emphasizes the multiple competencies of bi multilingual learners as the basis for successful language teaching and learning This volume takes a big step forward in re situating the issue of multilingualism more centrally in applied linguistics and in so doing making more permeable its key sub disciplinary boundaries particularly those between SLA TESOL and bilingual education It addresses this issue head on bringing together key international scholars in SLA TESOL and bilingual education to explore from cutting edge interdisciplinary perspectives what a more critical multilingual perspective might mean for theory pedagogy and practice in each of these fields *Catalogue of the Mercantile Library of the City of Brooklyn* , 1878 **The American Secondary School** Leonard V.
