Worksheet: Whale Dichotomous Key

A classification system is a way of separating a large group of closely related organisms into smaller sub groups. With such a system, identification of an organism is easy. The scientific names of organisms are based on the classification system of living organisms.

To classify organisms, scientists often use a dichotomous key. A dichotomous key is a listing of specific characteristics, such as structure and behavior, in such a way that an organism can be identified through a process of elimination.

In this investigation, it is expected that you:

- 1) Use the key to identify 10 whales.
- 2) Use Figure 1 as a guide to the anatomical features used in the key.
- 3) Pick an animal in Figure 2. Read both sentences for #1 in the key and chose which one best describes the animal. Follow the numbers until you identify it to species.
- 4) Continue this process with each drawing until all animals have been identified. Write the name on the line below each animal.
