

TOPICS FOR SPEAKING TEST - 2ND SEMESTER (2020-2021)

GRADE 11

UNIT 6: GLOBAL WARMING

1. How can young people help to reduce global warming?

Well, as a youngster, I suppose there are several practiceable ways to improve the current environmental condition.

Initially, we can limit the use of plastic products, replacing them by eco-friendly or recyclable materials. For instance, bringing our own bottle instead of buying bottled water every day or choosing the café using paper straws instead of plastic ones. Those actions contribute to reduce the amount of waste which would take million years to break down.

Another viable attempt is conserve more. Young people often overrely on the availability of water and electricity and take those resources for granted. Admittedly, I sometimes forget to turn off the light or use air-conditioners unnecessarily.

And with the advent of technology, shopping is convenient than ever, thus, more people fall prey to rampant consumerism. Especially students, we tend to splurge money on non-essential products and throw them away after a short time. That creates a huge carbon footprint while it is suggested that we contemplate what we're inclined to buy, choose fine quality products and use them carefully for a long time.

2. What are the benefits of using eco-friendly products?

Obviously, eco-friendly products create positive impact on both individuals and the environment. It goes without saying that biodegradable or recyclable materials help cut down the amount of waste, which would take thousand years to break down. In manufacturing process, environmentally-friendly products also use less resources like water or electricity, thus reduce the carbon footprint.

Taking personal advantages into consideration, people's health can be improved by using eco-friendly food or utensils because we can avoid prolonged exposure to hazardous chemicals, which would bring about diseases in the long run. Furthermore, via those products, we can make
