Call to Ambulance Service – non-injury calls are relegated as low priority

Delayed responses can exacerbate these injuries and present secondary negative impacts for a patient

Avoiding unnecessary conveyance to hospital helps to avoid unnecessary admissions

These calls may come from:-

Health and Social Care professionals on finding the client on the floor

Care Agencies

LifeLine Companies

Nursing and Residential Care Homes

Family

Members of the Public

Often there is no further referral on or assessment of cause and prevention

This means falls will make up an even greater proportion of calls made to the ambulance service, placing a greater strain on frontline resources and staff. In addition to this, obesity levels in the UK are increasing

Timaeus In their rewriting of Plato's narrative the English texts deploy but also destabilize the ancient conceptual polarization of the rational and the irrational or chaotic rethought in the terms offered by their period's innovative practices of reasoning The study establishes the critical importance of telling a story of chaos by comparing the narrative method of its chosen texts with that adopted by Freud and Lacan as a means of reflection on the psychoanalytic encounter with an ultimately chaotic Real This book has unusual interdisciplinary scope and offers historically grounded theoretically informed new readings of four major early modern English literary texts
