The Youth Dividend Jan H. Hofmeyr, 2012 **OECD Development Policy Tools Evidence-based Policy Making for Youth Well-being A Toolkit** OECD, 2017-10-17 With 1.2 billion people today's youth population aged 15-24 represents the largest cohort ever to enter the transition to adulthood. Close to 90% of these young people live in developing countries and the numbers will practically double in the least developed countries **From School to Higher Education?** Michael Cosser, Jacques Du Toit, 2002 This substantive report is essential reading for those involved in higher education planning and policy making **ETDP SETA Scarce & Critical Skills Guide 2010/11** , **Discrimination in an Unequal World** Miguel Angel Centeno, Katherine S. Newman, 2010-09 Is globalization making our world more equal or less? Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills. Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity. Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination. Tackling this challenge *Discrimination in an Unequal World* explores the relationship between discrimination and unequal outcomes in the appropriate geographical and historical context. Noting how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices. However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared. Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies, the democratization of inequality and the disappearance of traditional categories **Universities, Employability and Human Development** Melanie Walker, Samuel Fongwa, 2017-01-20 The book makes a significant contribution to critical higher education studies specifically to graduate employability research and to capabilities and education research. The book moves beyond the simplistic conception of alleged gaps in graduate skills and mismatches between employers and universities and instead provides an innovative multi-dimensional and intersectional human capabilities conceptualisation of graduate employability. The book challenges an individualised notion of employability instead locating employability issues in social and economic conditions and argues that employability choices cannot be divorced from inequality. Qualitative and quantitative data from multiple case study universities in South Africa are used to explore the perceptions and experiences of diverse students, lecturers, support officers and employers regarding what each university is doing or should be doing to enhance graduate economic opportunities and contribute to inclusive development. The book will be highly relevant to students, scholars and researchers in the fields of education and sociology particularly those with an interest in graduate employability [Creating the New African University](#) , 2023-05-25 *Creating the New African University* grapples with the existence of African universities particularly in post-independent Africa where Higher

Education Institutions HEIs are supposed to live up to the expectations of being adaptive in dealing with prevalent complex dynamic contemporary and future challenges facing African societies The book tackles the issue of what ought to be done for African universities to maintain a structure and identity that ensures their relevance in Africa s development through generating and transforming knowledge into actions for the common good It engages issues within the context of how post colonial transformative obligations have been managed in light of the prevalent epistemological and pedagogical underpinnings that form the foundations of these universities as they seek to break from the clutches of colonial legacies This book further highlights an urgent need to do away with silos and embrace a multidisciplinary interdisciplinary transdisciplinary and cross disciplinary dialogical approach towards knowledge generation Such an approach is essential in efforts aimed at enhancing the sustainable reconfiguration of university structures and functions whilst linking knowledge produced to diverse social economic and political facets of African societies in ways that promote and sustain competitiveness in a rapidly globalising world beset with technological advancements
