Narrative Psychology and Vygotsky in Dialogue Jill Bradbury,2019-09-06 This book draws together two domains of psychological theory Vygotsky s cultural historical theory of cognition and narrative theories of identity to offer a way of rethinking the human subject as embodied relational and temporal A dialogue between these two ostensibly disparate and contested theoretical trajectories provides a new vantage point from which to explore questions of personal and political change In a world of deepening inequalities and increasing economic precarity the demand for free decolonised quality education as articulated by the South African Student Movement and in many other contexts around the world is disrupting established institutional practices and reinvigorating possibilities for change This context provokes new lines of hopeful thought and critical reflection on discontinuities across historical time theories of social and psychological developmental processes and the practices of intergenerational life particularly in the domain of education for the making of emancipatory futures This is essential reading for academics and students interested in Vygotskian and narrative theory and critical psychology as well as those interested in the politics and praxis of higher education

World Development Report 2024 World Bank,2024-08-01

Middle income countries are in a race against time Many of them have done well since the 1990s to escape low income levels and eradicate extreme poverty leading to the perception that the last three decades have been great for development But the ambition of the more than 100 economies with incomes per capita between US 1 100 and US 14 000 is to reach high income status within the next generation When assessed against this goal their record is discouraging Since the 1970s income per capita in the median middle income country has stagnated at less than a tenth of the US level With aging populations growing protectionism and escalating pressures to speed up the energy transition today s middle income economies face ever more daunting odds To become advanced economies despite the growing headwinds they will have to make miracles Drawing on the development experience and advances in economic analysis since the 1950s World Development Report 2024 identifies pathways for developing economies to avoid the middle income trap It points to the need for not one but two transitions for those at the middle income level the first from investment to infusion and the second from infusion to innovation Governments in lower middle income countries must drop the habit of repeating the same investment driven strategies and work instead to infuse modern technologies and successful business processes from around the world into their economies This requires reshaping large swaths of those economies into globally competitive suppliers of goods and services Upper middle income countries that have mastered infusion can accelerate the shift to innovation not just borrowing ideas from the global frontiers of technology but also beginning to push the frontiers outward This requires restructuring enterprise work and energy use once again with an even greater emphasis on economic freedom social mobility and political contestability Neither transition is automatic The handful of economies that made speedy transitions from middle to high income status have encouraged enterprise by disciplining powerful incumbents developed talent by rewarding merit and capitalized on crises to alter policies and institutions that no longer suit the purposes they were once designed to serve Today s middle income countries will have to do the same

Student Financing of Higher Education Donald Heller,Claire

Callender,2013-06-07 The financing of higher education is undergoing great change in many countries around the world In recent years many countries are moving from a system where the costs of funding higher education are shouldered primarily by taxpayers through government subsidies to one where students pay a larger share of the costs There are a number of factors driving these trends including A push for massification of higher education in the recognition that additional revenue streams are required above and beyond those funds available from governments in order to achieve higher participation rates Macroeconomic factors which lead to constraints on overall government revenues Political factors which manifest in demands for funding of over services thus restricting the funding available for higher tertiary education A concern that the returns to higher education accrue primarily to the individual rather than to society and thus students should bear more of the burden of paying for it This volume will help to contribute to an understanding of how these trends occur in various

countries and regions around the world and the impact they have on higher education institutions students and society as a whole With contributions for the UK USA South Africa and China this vital new book gives a truly global picture of the rapidly changing situation The Youth Dividend Jan H. Ralarala, Salochana Lorraine Hassan, Rajani Naidoo, 2021-05-25 Knowledge remains timely in education The need for academics to contemplate its relevance worth use and everything in between deems a continuous intellectual project rather than a conundrum to be solved This book takes the South African context by the horns as it challenges the often dormant and traditionalist ways in which higher education spaces see knowledge Through original research and the voices of academics and students this book argues for repurposing knowledge generation knowledge sharing and critical pedagogy so that more inclusive teaching and learning environments can be both imagined and sustained The contentious tensionalities that this creates for LoLT and SoTL in particular are unlocked so as to trouble the South African higher education landscape with the intent to proffer alternative pathways for a knowledge beyond colour lines Prof
