WHAT LIES BENEATH THE SURFACE. GINNY. DAVIS, 2021      **Paradoxes of European Legal Integration** Anne Lise Kjær, Mikael Rask Madsen, 2016-12-05 Focusing on paradoxes and tensions of European legal integration this book investigates four complex and inherently contradictory processes constitutionalization and democratization institution building and market making cross cultural communication and European discourse and cultural exceptionalism and normalization to offer a new framework for understanding contemporary European integration The volume features contributions from some of the biggest names in European legal philosophy to include Neil MacCormick Yves Dezalay and Bryant Garth Pierre Legrand Heikki Mattila and David Nelken It presents a timely interdisciplinary approach to an important and topical area and will be of interest to those concerned with the place of socio legal processes language and culture in the continuous advancement of the EU project      **What lies beneath? Investigations of atomic force microscopy-based nano-machining to reveal sub-surface ferroelectric domain configurations in ultrathin films** Lynette Keeney, Louise Colfer, Debismita Dutta, Michael Schmidt, Guannan Wei, 2023-10-20 Multiferroic materials encompassing simultaneous ferroelectric and ferromagnetic polarization states are enticing multi state materials for memory scaling beyond existing technologies Aurivillius phase B6TFMO Bi6TixFeyMnzO18 is a unique room temperature multiferroic material that could ideally be suited to future production of revolutionary memory devices As miniaturization of electronic devices continues it is crucial to characterize ferroelectric domain configurations at very small sub 10 nm thickness Direct liquid injection chemical vapor deposition allows for frontier development of ultrathin films at fundamental close to unit cell dimensions However layer by layer growth of ultrathin complex oxides is subject to the formation of surface contaminants and 2D islands and pits which can obscure visualization of domain patterns using piezoresponse force microscopy PFM Herein we apply force from a sufficiently stiff diamond cantilever while scanning over ultrathin films to perform atomic force microscopy AFM based nano machining of the surface layers Subsequent lateral PFM imaging of sub surface layers uncovers 45 orientated striped twin domains entirely distinct from the randomly configured piezoresponse observed for the pristine film surface Furthermore our investigations indicate that these sub surface domain structures persist along the in plane directions throughout the film depth down to thicknesses of less than half of an Aurivillius phase unit cell 2.5 nm Thus AFM based nano machining in conjunction with PFM allows demonstration of stable in plane ferroelectric domains at thicknesses lower than previously determined for multiferroic B6TFMO These findings demonstrate the technological potential of Aurivillius phase B6TFMO for future miniaturized memory storage devices Next generation devices based on ultrathin multiferroic tunnel junctions are projected      *The Eclectic Magazine of Foreign Literature, Science, and Art*, 1881      Eclectic Magazine of Foreign Literature, 1881      *Athenaeum and Literary Chronicle* James Silk Buckingham, John Sterling, Frederick Denison Maurice, Henry Stebbing, Charles Wentworth Dilke, Thomas Kibble Hervey, William Hepworth Dixon, Norman Maccoll, Vernon

Docufictions Gary D. Rhodes, John Parris Springer, 2014-10-01 Through most of the 20th century the distinction between the fictional narrative film and the documentary was vigorously maintained The documentary tradition developed side by side with but in the shadow of the more commercially successful feature film In the latter part of the century however the two forms merged on occasion and mockumentaries fictional works in a documentary format and docudramas reality based works in a fictional format became part of the film and television landscape The 18 essays here examine the relationships between narrative fiction films and documentary filmmaking focusing on how each influenced the other and how the two were merged in such diverse films and shows as *Citizen Kane* *M A S H* *This Is Spinal Tap* and *Destination Moon* Topics include the docudrama in early cinema the industrial film as faux documentary the fear evoked in 1950s science fiction films the selling of reality in mockumentaries and reality television and documentary forms The essays provide a foundation for significant rethinking of film history and criticism offering the first significant discussion of two emerging and increasingly important genres Instructors considering this book for use in a course may request an examination copy here

let it all go In this highly anticipated conclusion to Father Rolheiser s spiritual classics *The Holy Longing* and *Sacred Fire* and with characteristic attentiveness and care Rolheiser accompanies readers on a spiritual journey through life s final years and the mellowing of our souls In these years bitterness can give way to forgiveness mere imagination to profound and subtle faith wishful optimism to virtuous hope and control to surrender Readers will learn to see in Jesus a model for a spirituality of holy passivity rather than activity and find in him the courage to overcome the darkest nights of faith Drawing on the work of John of the Cross and Henri Nouwen Rolheiser outlines a spirituality capable of giving away one s death and by that a spirituality of truly living
