This book is a book of knowledge It is not intended to go into depth in any one subject matter Rather it gives an overview of

many different subject areas such as the sciences history philosophy and literature With that type of an overview one can then focus on specific areas of interest and make a decision either then to become a subject matter expert in a specific area or simply to broaden one s knowledge in a multitude of areas The first part of the book deals with the basics The basics are such things as physics chemistry biology weather the oceans astronomy the human body language writing and money With an understanding of those basics hopefully the reader will have a better appreciation of the interaction between chemistry physics and biology Hopefully the reader will have a keener appreciation of how weather oceans and astronomy are interrelated The reader will also have a better understanding of not only how the human body works but also how the human brain deals with language and has developed writing Finally as part of the basics there is a chapter that deals with the economy and how money works Part II deals with history and in particular the role of freedom As one of the professors in this book states the role of freedom is probably overrated in the course of human history Many historians espouse the idea that all people crave freedom Rather what they really crave is order food on the table and a roof over their head If they have those things then they have the luxury of seeking to be free The final part of the book deals with specific people of the world including the Vikings the Mongolians the Chinese and many more
