When Is The Intake Of Zrp For 2015:

Information Sciences and Systems 2015 Omer H. Abdelrahman, Erol Gelenbe, Gokce Gorbil, Ricardo Lent, 2015-08-20
The 30th Anniversary of the ISCIS International Symposium on Computer and Information Sciences series of conferences started by Professor Erol Gelenbe at Bilkent University Turkey in 1986 will be held at Imperial College London on September 22-24, 2015. The preceding two ISCIS conferences were held in Krakow, Poland in 2014 and in Paris, France in 2013. The Proceedings of ISCIS 2015 published by Springer brings together rigorously reviewed contributions from leading international experts. It explores new areas of research and technological development in computer science, computer engineering, and information technology and presents new applications in fast-changing fields such as information science, computer science, and bioinformatics. The topics covered include but are not limited to advances in networking technologies, software-defined networks, distributed systems, and the cloud; security in the Internet of Things; sensor systems; and machine learning and large data sets. Tailored Organic-Inorganic Materials Ernesto Brunet, Jorge L. Colón, Abraham Clearfield, 2015-05-29 This book explores the limitless ability to design new materials by layering clay materials within organic compounds. Assembly, properties, characterization, and current and potential applications are offered to inspire the development of novel materials. Coincides with the government's Materials Genome Initiative to inspire the development of green, sustainable, robust materials that lead to efficient use of limited resources. Contains a thorough introductory and chemical foundation before delving into techniques, characterization, and properties of these materials. Applications in biocatalysis, drug delivery, and energy storage and recovery are discussed. Presents a case for an often overlooked hybrid material: organic clay materials. **Report of the Sustainable Ocean Initiative Capacity-Building Workshop for the Wider Caribbean and Central America on Other Effective Area-Based Conservation Measures in the Marine Fishery Sector** Food and Agriculture Organization of the United Nations, Secretariat of the Convention on Biological Diversity, 2023-10-09 The Sustainable Ocean Initiative Capacity Building Workshop for the Wider Caribbean and Central America on Other Effective Area-Based Conservation Measures (OECMs) in the Marine Fishery Sector was co-organized by the Convention on Biological Diversity (CBD) Secretariat and the Food and Agriculture Organization of the United Nations (FAO). The workshop was held online on 20-21 April and 27-28 April 2022. It sought to establish a way forward to identify fisheries-related OECMs in the Caribbean and provide technical input to prepare and test FAO's practical guidance for identifying, evaluating, and reporting OECMs in marine fisheries. The main points covered during the expert meeting related to introducing participants to the OECM concept, providing an overview of the regional initiatives for biodiversity conservation, and exploring the current and potential place of fisheries management and OECMs in these regional initiatives, providing participants with an overview of the criteria and subcriteria for OECM identification, and providing participants with an overview of the OECM reporting process and the potential capacity building needs to identify, evaluate, and report OECMs in

the Wider Caribbean Region During the expert meeting participants conducted practical exercises by applying the OECM criteria to eight real life case studies from Brazil Colombia Costa Rica Mexico and the United States of America Participants also discussed the role of OECMs in recognizing conservation efforts the need to recognize fishers local culture in the OECM process the incentives provided by OECM recognition OECM identification and evaluation and the use of international guidance to support the identification and evaluation of OECMs

Communication and Computing Systems B.M.K.

Prasad,Krishna Kant Singh,Neelam Ruhil,Karan Singh,Richard O'Kennedy,2017-02-15 This book is a collection of accepted papers that were presented at the International Conference on Communication and Computing Systems ICCCS 2016

Dronacharya College of Engineering Gurgaon September 9 11 2016 The purpose of the conference was to provide a platform for interaction between scientists from industry academia and other areas of society to discuss the current advancements in the field of communication and computing systems The papers submitted to the proceedings were peer reviewed by 2 3 expert referees This volume contains 5 main subject areas 1 Signal and Image Processing 2 Communication Computer Networks 3 Soft Computing Intelligent System Machine Vision and Artificial Neural Network 4 VLSI Embedded System 5 Software Engineering and Emerging Technologies

Thermochemical Conversion of Biomass Feedstock and Solid Waste into Biofuels Yanjun Hu,Nan Zhou,Shurong

Wang,Jianhua Yan,2025-05-09 Thermochemical Conversion of Biomass Feedstock and Solid Waste into Biofuels Production and Pollutant Control offers a comprehensive overview of the state of the art in biofuel production with a special focus on pollutants control which is both necessary and beneficial for the target audience and the development of this research field Biofuel is currently a major trend due to the existing environmental crises and global energy challenges Developing sustainable biofuels from biomass feedstock and solid waste along with minimizing the formation of pollutants during the conversion processes are currently of significant academic and industrial importance drawing widespread attention Novel

processes reactions and catalysts are being rapidly developed and compiling this information is invaluable for keeping the audience informed and up to date In addition while research on the formation and transformation of pollutants such as heavy metals chlorine nitrogen and sulfur species are often conducted by environmental scientists and engineers it is less familiar to bioenergy researchers This book aims to bridge the gap between relevant disciplines and presents a comprehensive overview of the entire research field Provides a state of the art overview of thermochemical conversion processes catalytic upgrading reactions and catalysts related to biofuel production from biomass feedstock and solid waste Evaluates the latest processes reactions and catalysts related to thermochemical conversion of emerging solid waste such as plastic waste Introduces the formation and control mechanisms of organic pollutants during the conversion and upgrading processes from the perspective of environmental scientists and engineers

Computer Networks Piotr Gaj, Andrzej Kwiecień, Piotr Stera, 2015-05-27 This book constitutes the thoroughly refereed proceedings of the 22st International Conference on Computer Networks CN 2015 held in Brun w Poland in June 2015 The 42 revised full papers presented were carefully reviewed and selected from 79 submissions The papers in these proceedings cover the following topics computer networks distributed computer systems communications and teleinformatics

Intelligent Systems and Applications W.C.-C. Chu, H.-C. Chao, S.J.-H. Yang, 2015-04-14 This book presents the proceedings of the International Computer Symposium 2014 ICS 2014 held at Tunghai University Taichung Taiwan in December ICS is a biennial symposium founded in 1973 and offers a platform for researchers educators and professionals to exchange their discoveries and practices to share research experiences and to discuss potential new trends in the ICT industry Topics covered in the ICS 2014 workshops include algorithms and computation theory artificial intelligence and fuzzy systems computer architecture embedded systems SoC and VLSI EDA cryptography and information security databases data mining big data and information retrieval mobile computing wireless communications and vehicular technologies software engineering and programming languages healthcare and bioinformatics among others There was also a workshop on information technology innovation industrial application and the Internet of Things ICS is one of Taiwan s most prestigious international IT symposiums and this book will be of interest to all those involved in the world of information technology

Discovery and Development of Neuroprotective Agents from Natural Products Goutam Brahmachari, 2017-05-18 Discovery and Development of Neuroprotective Agents from Natural Products draws together global research on medicinal agents from natural sources as starting points for the design of neuroprotective drugs From the prediction of promising leads and identification of active agents to the extraction of complex molecules the book explores a range of important topics to support the development of safer more economical therapeutics for these increasingly prevalent diseases Beginning with an overview of current developments in the field the book goes on to explore the identification extraction and phytochemistry of such neuroprotective agents as antioxidants biophenols and naturally occurring anti inflammatory steroid analogues Specific natural sources of bioactive agents are

reviewed and the development of these agents into therapeutics for a number of specific neurological disorders including Alzheimer's disease, Parkinson's disease and ischemic brain stroke are discussed. Combining the expertise of specialists from around the world, this in the Natural Products Drug Discovery series aims to support and encourage researchers in the investigation of natural sources as starting points for the development of standardized, safe and effective neuroprotective drugs. Features chapters written by active researchers and leading global experts deeply engaged in the research field of natural product chemistry for drug discovery. Includes comprehensive coverage of cutting edge research advances in the design of drugs from natural products targeted at different kinds of neurodegenerative diseases. Offers a practical review of identification, isolation and extraction techniques to support medicinal chemists in the lab.

Handbook of Nanofillers

Shadpour Mallakpour, Chaudhery Mustansar Hussain, 2025-08-05. This handbook presents the basic concepts of nanofillers, their types, unique properties including their structure, surface area, properties, real time applications. The book discusses basics of nanofillers, their types, their structures and properties as well as several applications. The chapters in this book cover latest developments, applications in the food industry, drug delivery, tissue technology, biosensors, electrically conductive polymers and insulators, green catalysis and environmental remediation. The contents of these books will be useful to researchers, industry practitioners and academics across disciplines of materials science, chemistry, biomedicine, industrial engineering and chemical engineering.

Futuristic Trends in Network and Communication Technologies Pradeep Kumar Singh, Gennady Veselov, Anton Pljonkin, Yugal Kumar, Marcin Paprzycki, Yuri Zachinyaev, 2021-03-30. This two volume set CCIS 1395, 1396 constitutes the refereed proceedings of the Third International Conference on Futuristic Trends in Network and Communication Technologies (FTNCT 2020) held in Taganrog, Russia, in October 2020. The 80 revised papers presented were carefully reviewed and selected from 291 submissions. The prime aim of the conference is to invite researchers from different domains of network and communication technologies to a single platform to showcase their research ideas. The selected papers are organized in topical sections on communication technologies, security and privacy, futuristic computing technologies, network and computing technologies, wireless networks and Internet of Things (IoT).

Methods and

Applications of Sample Size Calculation and Recalculation in Clinical Trials Meinhard Kieser, 2020-11-19. This book provides an extensive overview of the principles and methods of sample size calculation and recalculation in clinical trials. Appropriate calculation of the required sample size is crucial for the success of clinical trials. At the same time, a sample size that is too small or too large is problematic due to ethical, scientific and economic reasons. Therefore, state of the art methods are required when planning clinical trials. Part I describes a general framework for deriving sample size calculation procedures. This enables an understanding of the common principles underlying the numerous methods presented in the following chapters. Part II addresses the fixed sample size design where the required sample size is determined in the planning stage and is not changed afterwards. It covers sample size calculation methods for superiority, non-inferiority and

equivalence trials as well as comparisons between two and more than two groups A wide range of further topics is discussed including sample size calculation for multiple comparisons safety assessment and multi regional trials There is often some uncertainty about the assumptions to be made when calculating the sample size upfront Part III presents methods that allow to modify the initially specified sample size based on new information that becomes available during the ongoing trial Blinded sample size recalculation procedures for internal pilot study designs are considered as well as methods for sample size reassessment in adaptive designs that use unblinded data from interim analyses The application is illustrated using numerous clinical trial examples and software code implementing the methods is provided The book offers theoretical background and practical advice for biostatisticians and clinicians from the pharmaceutical industry and academia who are involved in clinical trials Covering basic as well as more advanced and recently developed methods it is suitable for beginners experienced applied statisticians and practitioners To gain maximum benefit readers should be familiar with introductory statistics The content of this book has been successfully used for courses on the topic
