The Epistemology of Desire and the Problem of Nihilism Allan Hazlett, 2024-07-12 Most people have wondered whether anything really matters some have temporarily thought that nothing really matters and some philosophers have defended the view that nothing really matters However if someone thinks that nothing matters if they are a nihilist about value then it seems that it is irrational for them to care about anything It seems that nihilism about value mandates total indifference This is the problem of nihilism Allan Hazlett addresses in *The Epistemology of Desire and the Problem of Nihilism* Hazlett argues that the problem of nihilism arises because desire and thus caring is a species of evaluation that admits of irrationality This contradicts the influential Humean view that desire does not admit of irrationality which has a ready solution to the problem of nihilism since desire does not admit of irrationality it cannot be irrational to care about something that you believe does not matter However following G E Anscombe Hazlett argues that desire has the same relationship to goodness as belief has to truth just as truth is the accuracy condition for belief goodness is the accuracy condition for desire This reveals desire as an appropriate target of epistemological inquiry in the same way that belief is an appropriate target of epistemological inquiry Desires can amount to knowledge in the same way that beliefs can amount to knowledge and crucially for the problem of nihilism desire admits of irrationality in the same way that belief admits of irrationality Nevertheless although it is obviously irrational to believe something that you believe is not true Hazlett argues that it is not irrational to desire something you believe is not good despite the fact that goodness is the accuracy condition for desire This provides a solution to the problem of nihilism and shows that nihilism about value can coherently be combined with the anti Humean view that desire is a species of evaluation

Socratic Puzzles Robert Nozick, 1997 One of the foremost philosophers of our time Robert Nozick continues the Socratic tradition of investigation This volume which illustrates the originality force and scope of his work also displays Nozick s trademark blending of extraordinary analytical rigor with intellectual playfulness As such Socratic Puzzles testifies to the great pleasure that both doing and reading philosophy can be Comprising essays and philosophical fictions classics and new work the book ranges from Socrates to W V Quine from the implications of an Israeli kibbutz to the flawed arguments of Ayn Rand Nozick considers the figure of Socrates himself as well as the Socratic method why is it a method of getting at the truth Many of these essays bring classic methods to bear on new questions about choice How should you choose in a disconcerting situation Newcomb s Problem

when your decisions are completely predictable Why do threats and not offers typically coerce our choices How do we make moral judgments when we realize that our moral principles have exceptions Other essays present new approaches to familiar intellectual puzzles from the stress on simplicity in scientific hypotheses to the tendency of intellectuals to oppose capitalism As up to date as the latest reflections on animal rights as perennial as the essentials of aesthetic merit doggerel by Isaac Newton goes to prove that changing our view of the world won't suffice as whimsical as a look at how some philosophical problems might appear from God's point of view these essays attest to the timeliness and timelessness of Nozick's thinking With a personal introduction in which Nozick discusses the origins tools and themes of his work Socratic Puzzles

Contemporary social transformations characterised by multi dimensional globalisation and technological change have lent new impetus to the emergence of internationally oriented and interdisciplinary childhood and youth studies Analysis of

sharpened polarisations of chances and risks within and between generations in specific life circumstances meets up with the re conceptualisation of childhood and youth as social constructions within the life course As such insulated national discourses are no longer an adequate framework to address such issues economic and cultural globalisation processes exert dual and reciprocal influences restructuring societies and identities from within and without This collection offers a three fold thematic focus on the social construction of the life course privileging gendered and family transitions and transformations on the contours of not belonging in particular bringing migration and poverty into the spotlight and on the potential of virtual worlds for creating and enabling new positive and negative forms of individual social and political action on the part of young people This collection thus offers a particular snapshot of the current landscape of childhood and youth studies and it provides a set of exemplars from diverse national contexts Each chapter can stand for itself but the contributions are ordered thematically not according to the corner of the world from which they derive As the introductory chapter explores the intention is via a loose vectoring of theme and context to encourage multiple opportunities for reflection on relations between the specificities and commonalities of children s and young people s lives today This volume joins the growing library of scholarly resources for international and interdisciplinary childhood and youth studies it brings together well established and young scholars writing from an unusual range of national and cultural contexts The collection will be of interest not simply for specialist researchers and those in related fields but equally as a teaching and learning resource for higher education professionals and students in social sciences and education including courses that link theory and research with policy and practice
