Mathematical Vistas Peter Hilton, Derek Holton, Jean Pedersen, 2013-06-29 Focusing Your Attention We have called this book Mathematical Vistas because we have already published a companion book Mathematical Reflections in the same series 1 indeed the two books are dedicated to the same principal purpose to stimulate the interest of bright people in mathematics It is not our intention in writing this book to make the earlier book a prerequisite but it is of course natural that this book should contain several references to its predecessor This is especially but not uniquely true of Chapters 3 4 and 6 which may be regarded as advanced versions of the corresponding chapters in Mathematical Reflections Like its predecessor the present work consists of nine chapters each devoted to a lively mathematical topic and each capable in principle of being read independently of the other chapters Thus this is not a text which as is the intention of most standard treatments of mathematical topics builds systematically on certain common themes as one proceeds 1 Mathematical Reflections In a Room with Many Mirrors Springer Undergraduate Texts in Mathematics 1996 Second Printing 1998 We will refer to this simply as MR 2 There was an exception in MR Chapter 9 was concerned with our thoughts on the doing and teaching of mathematics at the undergraduate level
