

Waves

'A wave is a disturbance that propagates in space and time.'

- A wave is caused by a **vibrating source**.
- Waves transfer **energy** but do not transfer the medium.

There are two basic types of wave motion (choose the right option)

- **progressive waves** — travelling disturbances that transfer
- **stationary (or) waves** — non-travelling waves that transfer energy from one end to the other.

Key terms			
term	symbol	definition	unit
amplitude		The displacement of the medium from its (equilibrium) position	
wavelength		The spatial period of the wave in the direction of motion: the distance between any two successive points with the phase (e.g. to)	
crest		the point on a wave	
trough		the point on a wave	
frequency		the of waves passing a point per	
period		the taken for complete wave to pass	

Use key terms from the table to label:

Wavelength amplitude crest trough

Blake, 2012-12-06 Electrocardiography is a mature discipline so familiar to both doctors and

patients that it's hardly noticed one of those tests that have always been there like the white count and hemoglobin not something one has to think about much or question To some extent this view is valid but it overlooks some important points Like the white count and hemoglobin electrocardiograms are produced by technicians using mechanical devices that turn out numbers but there is a difference The white count and hemoglobin are reported as single values to be interpreted by the doctor who knows the patient and ordered the test but the graph produced by an EKG machine represents millions of numbers displayed as XY plots a message written in a language different from one's own It requires translation and this means that the translator must not only know the language but also be able to assess the effects on it of the many factors that may have modified its meaning between origin and delivery There is potential for harm to the patient as well as for help in every facet of the process and to lose sight of this to see the tracing as a single whole would be like seeing words as units without considering the letters that compose them When we read we do recognize whole words patterns but having learned the letters first revert to this base intuitively when we encounter a new word or one that is misspelled **Choice**, 1988
