4. The diagram to the right shows a pulse traveling from a "heavy" string to a "light" string. Draw the reflected and transmitted pulses after the original pulse has reached point P.

You need to decide how picky you want to be. You may only wish to emphasize the phase of the pulse. You may also want to include size and/or speed. The pulse will be faster in the lighter string, and will also be larger if the pulse is going from heavy to light.

5. Below is a pulse in a light rope approaching a heavy rope. Sketch the two rope system just after the pulse hits the wall.

6. To the right is a two-rope system soon after a pulse arrived at the center.

- a) If the right rope is the heavy rope, what did the system look like just after the system was shaken? In other words, show with a sketch which end was shaken and if the shake was up or down.

- b) If the left rope is the heavy rope, what did the system look like just after the system was shaken?

7. On the lines below draw the pulses as they would appear after they have completed their reflection from the end. Slanted lines, (/ /), following the barrier line represent a fixed end.
