Answer Key

Vocabulary: amplitude, compression, crest, frequency, linear mass density, longitudinal wave, medium, period, power, rarefaction, transverse wave, trough, wave, wavelength, wave speed

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

[Note: The purpose of these questions is to activate prior knowledge and get students thinking. Students are not expected to know the answers to the Prior Knowledge Questions.]

1. A buoy is anchored to the ocean floor. A large wave approaches the buoy. How will the buoy move as the wave goes by?

Answers will vary. [The buoy will move up and down and back and forth, tracing a circular motion, as the wave passes.]

2. The two images show side views of ocean waves. How are the two sets of waves different?

Sample answer: The waves in the left image are closer together and higher than the waves in the right image. The tops (crests) of the waves on the left are pointier.

Gizmo Warm-up

Ocean swells are an example of **waves**. In the Waves Gizmo, you will observe wave motion on a model of a spring. The hand can move the spring up and down or back and forth.

To begin, check that the **Type of wave** is **Transverse**, **Amplitude** is 20.0 cm, **Frequency** is 0.75 Hz, **Tension** is 3.0 N, and **Density** is 1.0 kg/m. (Note: In this Gizmo, "density" refers to the **linear mass density**, or mass per unit length. It is measured in units of kilograms per meter.)

1. Click **Play** (▶). How would you describe the motion of a **transverse wave**? *The coils of the spring model move up and down as the wave goes from left to right.*

Click **Pause** (⏸). Notice the **crests** (high points) and **troughs** (low points) of the wave.

2. Click **Reset** (↺). Choose the **Longitudinal** wave and increase the **Amplitude** to 20.0 cm. Click **Play**. How would you describe the motion of a **longitudinal wave**?

The coils of the spring model move back and forth as the wave goes from left to right.

Click **Pause**. Notice the **compressions** in the wave where the coils of the spring model are close together and the **rarefactions** where the coils are spread apart.

The Influence of Teacher-Student Relationships and Feedback on Students' Engagement with Learning Roger Wood, 2018-06-11 This book presents a potential hierarchy between the three basic psychological needs central to Self-Determination Theory (SDT) Findings from the author's research suggest that the motivation to exercise autonomy is an outcome that is cumulatively influenced by the perceived quality of the teacher-student relationship and students' perceived competence within specific learning contexts and with a specific teacher These findings are the basis for three hypotheses regarding students' motivation to engage with learning activities The first is that perceived competence is informed by and reciprocally informs the quality of the teacher-student relationship The second is that students' perceived competence and the quality of the teacher-student relationship have a combined impact upon students' autonomous motivation The final point is that a teacher can be autonomy supportive both prior to and

during activities where students have opportunities to exercise their autonomy Such autonomy support includes the influence of teacher feedback upon students perceived competence and their subsequent motivation to autonomously engage with learning activities This research begins to unravel such motivational interplay through an SDT informed model which is used as the basis for discussing the specific influence of teacher feedback and autonomy support upon students engagement with learning activities in formal learning settings The findings and model are worthy of further testing and development as part of the wider agenda of student engagement wellbeing and positive psychology prevalent in educational research education psychology and the philosophy of social motivation

When Crime Waves Vincent Sacco,2005-05-11 Despite its wide usage the concept of the crime wave has rarely been given explicit and detailed attention by criminologists It is important that we understand where they come from how they develop and what their consequences are When Crime Waves offers an in depth exploration of a large number of social issues involved in the study of crime waves Issues such as how and why crime rates change over time why some types of crime and not others come in waves and the role played by the mass media politicians and interest group leaders in the promotion of crime waves are discussed to help students develop analytical skills and apply them to real world situations Key Features Critically examines the phenomenon of crime waves in an engaging fashion Provides multiple perspectives via historical and contemporary examples throughout the book Delves into the role played by politicians and the media in creating the perception that a crime wave has occurred Presents themes of myth making cultural imagery and social constructionism When Crime Waves is intended to be a supplementary text for undergraduate criminology and sociology courses including Introduction to Criminology and Criminal Justice Crime when and where crimes occur and what contributes to the views on crime held by the police lawmakers and members of the general public

Identity Interconnections Aerial A. Ashlee,Lisa Delacruz Combs,2023-07-03 Co published with This book advocates an approach the authors call Identity Interconnections as a way of moving considerations of identity differences and commonalities from theory to socially just action in student affairs practice Through pursuing complex commonalities expansive enough to hold both similarities and differences student affairs educators can ethically consider identity interconnections in such a way that does not diminish difference but instead recognizes points of difference as opportunities for social justice action By pursuing radical interconnectivity student affairs educators can advance an interdependent understanding of inherited systems of power recognizing the ways in which all systems and thus all oppression and all liberation are interconnected This interconnected insight can enable student affairs educators to extend beyond binary and oppositional thinking and in turn give rise to the formation of new coalitions Finally by listening with raw openness allowing themselves and encouraging their students to be changed by others experiences student affairs educators can facilitate identity development and social justice action as interrelated endeavors The editors have heard comments like This is all great in theory but how can student affairs practitioners actually apply this This book answers that question by providing a

theoretical framework and multiple practical examples for employing identity interconnections as expansive approaches to identity development and social justice action in student affairs
