War Of The Ages:

The Just War in the Middle Ages Frederick H. Russell, 1975 The first systematic attempt to reconstruct from original manuscript sources and early printed books the medieval doctrines relating to the just war the holy war and the crusade Despite the frequency of wars and armed conflicts throughout the course of western history no comprehensive survey has previously been made of the justifications of warfare that were elaborated by Roman lawyers canon lawyers and theologians in the twelfth and thirteenth century universities After a brief survey of theories of the just war in antiquity with emphasis on Cicero and Augustine and of thought on early medieval warfare the central chapters are devoted to scholastics such as Pope Innocent IV Hostiensis and Thomas Aquinas Professor Russell attempts to correlate theories of the just war with political and intellectual development in the Middle Ages His conclusion evaluates the just war in the light of late medieval and early modern statecraft and poses questions about its compatibility with Christian ethics and its validity within international law

The Civil War in the Age of Nationalism Duncan A. Campbell, Niels Eichhorn, 2024-04-10 While historians have acknowledged that the issues of race slavery and emancipation were not unique to the American Civil War they have less frequently recognized the conflict's similarities to other global events As renowned historian Carl Degler pointed out the Civil War was one among many such conflicts during the mid nineteenth century Understanding the Civil War's place in world history requires placing it within a global context of other mid nineteenth century political social and cultural issues and events In *The Civil War in the Age of Nationalism* Niels Eichhorn and Duncan A Campbell explore the conflict from this perspective taking a transnational and comparative approach with a particular focus on the period from the 1830s to the 1870s Eichhorn and Campbell examine the development of nationalism and its frequent manifestation secession by comparing the American experience with that of several other nations including Germany Hungary and Brazil They compare the Civil War to the Crimean and Franco German wars to determine whether the American conflict was the first modern war To gauge the potential of foreign intervention in the Civil War they look to the time's developing international debate on the legality of intercession and mediation in other nations insurgencies Using the experiences of Indigenous peoples in the Americas Africa and the Antipodes Eichhorn and Campbell suggest the extent to which the United States was an imperial project To examine realpolitik they study four vastly different practitioners Otto von Bismarck Louis Napoleon Count Cavour and Abraham Lincoln Finally they compare emancipation in the United States to that in Peru and the end of forced servitude in Russia closing with a comparison of the memorialization of the Civil War with the experiences of other post emancipation societies and an examination of how other nations mythologized their past conflicts and ignored uncomfortable truths in the pursuit of reconciliation *The Civil War in the Age of Nationalism* avoids the limitations of American exceptionalism making it the first genuine comparative and transnational study of the Civil War in an international context

the Laws of War: Volume 1 Alexander Gillespie,2011-09-06 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and regulating the treatment of captives This first book on warfare deals with the broad question of whether the patterns of dealing with combatants and captives have changed over the last 5 000 years and if so how In terms of context the first part of the book is about combatants and those who can lawfully take part in combat In many regards this part of the first volume is a series of less than ideal pathways This is because in an ideal world there would be no combatants because there would be no fighting Yet as a species we do not live in such a place or even anywhere near it either historically or in contemporary times This being so a second best alternative has been to attempt to control the size of military forces and therefore the bloodshed This is also not the case by which humanity has worked over the previous centuries Rather the clear assumption for thousands of years has been that authorities are allowed to build the size of their armed forces as large as they wish The restraints that have been applied are in terms of the quality and methods by which combatants are taken The considerations pertain to questions of biology such as age and sex geographical considerations such as nationality and the multiple nuances of informal or formal combatants These questions have also overlapped with ones of compulsion and whether citizens within a country can be compelled to fight without their consent Accordingly for the previous 3 000 years the question has not been whether there should be a limit on the number of soldiers but rather who is or is not a lawful combatant It has rarely been a question of numbers It has been and remains one

of type The second part of this book is about people typically combatants captured in battle It is about what happens to their status as prisoners about the possibilities of torture assistance if they are wounded and what happens to their remains should they be killed and their bodies fall into enemy hands The theme that ties all of these considerations together is that all of the acts befall those who are to one degree or another captives of their enemies As such they are no longer masters of their own fate As a work of reference this first volume as part of a set of three is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself **The Upheaval of War** Richard Wall, Jay

Love. 1925 United States. Surgeon-General's Office, 1921 **The Nature of War in the Information Age** David J. Lonsdale, 2004-06-01 There has been a great deal of

speculation recently concerning the likely impact of the Information Age on warfare In this vein much of the Revolution in Military Affairs RMA literature subscribes to the idea that the Information Age will witness a transformation in the very nature of war In this book David Lonsdale puts that notion to the test Using a range of contexts the book sets out to look at whether the classical Clausewitzian theory of the nature of war will retain its validity in this new age The analysis covers the character of the future battlespace the function of command and the much hyped concept of Strategic Information Warfare Finally the book broadens its perspective to examine the nature of Information Power and its implications for geopolitics Through an assessment of both historical and contemporary case studies including the events following September 11 and the recent war in Iraq the author concludes that although the future will see many changes to the conduct of warfare the nature of war as given theoretical form by Clausewitz will remain essentially unchanged
