Posters for Peace Thomas W. Benson, 2015-06-18 By the spring of 1970 Americans were frustrated by continuing war in Vietnam and turmoil in the inner cities Students on American college campuses opposed the war in growing numbers and joined with other citizens in ever larger public demonstrations against the war Some politicians including Ronald Reagan Spiro Agnew and Richard Nixon exploited the situation to cultivate anger against students At the University of California at Berkeley student leaders devoted themselves along with many sympathetic faculty to studying the war and working for peace A group of art students designed produced and freely distributed thousands of antiwar posters Posters for Peace tells the story of those posters bringing to life their rhetorical iconography and restoring them to their place in the history of poster art and political street art The posters are vivid simple direct ironic and often graphically beautiful Thomas Benson shows that the student posters from Berkeley appealed to core patriotic values and to the legitimacy of democratic deliberation in a democracy even in a time of war *English Modernism, National Identity and the Germans, 1890-1950* Petra Rau, 2016-05-13 This is the first systematic study to trace the way representations of Germanness in modernist British literature from 1890 to 1950 contributed to the development of English identity Petra Rau examines the shift in attitudes towards Germany and Germans from suspicious competitiveness in the late Victorian period to the aggressive hostility of the First World War and the curious inconsistencies of the 1930s and 1940s These shifts were no simple response to political change but the result of an anxious negotiation of modernity in which specific aspects of Englishness were projected onto representations of Germans and Germany in English literature and culture While this incisive argument clarifies and deepens our understanding of cultural and national politics in the first half of the twentieth century it also complicates current debates surrounding race and otherness in cultural studies Authors discussed include major figures such as Conrad Woolf Lawrence Ford Forster and Bowen as well as popular or less familiar writers such as Saki Graham Greene and Stevie Smith Accessibly written and convincingly argued Rau's study will not only be an important book for scholars but will serve as a valuable guide to undergraduates working in modernism literary history and European cultural relations **Art and Propaganda during Peronist Argentina** Iliana Cepero, 2025-06-19 This book chronicles the history of the visual languages developed in Argentina during Peronism exploring how art and propaganda interacted with and responded to their historical

context At the heart of this study is the term intentional citations a framework that advocates for the socio cultural specificity of Latin American modernist art in contrast to models that overly rely on European concepts of modernism and the avant garde Readers will discover how Argentinian artists cited European artworks to express particular ideas and goals how Peronist propaganda employed various artistic traditions including abstraction for political purposes and how ideologues rebranded Per n and Eva as a formidable ruling couple This book also examines how the Peronist regime and artists competed for control of the cultural field Despite their stark political differences however both factions pursued similar goals

Guffey, 2014-10-15 From band posters stapled to telephone poles to the advertisements hanging at bus shelters to the inspirational prints that adorn office walls posters surround us everywhere but do we know how they began Telling the story of this ephemeral art form Elizabeth E Guffey reexamines the poster's roots in the nineteenth century and explores the relevance they still possess in the age of digital media Even in our world of social media and electronic devices she argues few forms of graphic design can rival posters for sheer spatial presence and they provide new opportunities to communicate across public spaces in cities around the globe Guffey charts the rise of the poster from the revolutionary lithographs that papered nineteenth century London and Paris to twentieth century works of propaganda advertising pop culture and protest Examining contemporary examples she discusses Palestinian martyr posters and West African posters that describe voodoo activities or Internet con men stopping along the way to uncover a rich variety of posters from the Soviet Union China the United States and more Featuring 150 stunning images this illuminating book delivers a fresh look at the poster and offers revealing insights into the designs and practices of our twenty first century world *The SAGE Encyclopedia of War: Social Science Perspectives* Paul Joseph, 2016-06-15 Traditional explorations of war look through the lens of history and military science focusing on big events big battles and big generals By contrast The SAGE Encyclopedia of War Social Science Perspective views war through the lens of the social sciences looking at the causes processes and effects of war and drawing from a vast group of fields such as communication and mass media economics political science and law psychology and sociology Key features include More than 650 entries organized in an A to Z format authored and signed by key academics in the field Entries conclude with cross references and further readings aiding the researcher further in their research journeys An alternative Reader's Guide table of contents groups articles by disciplinary areas and by broad themes A helpful Resource Guide directing researchers to classic books journals and electronic resources for more in depth study This important and distinctive work will be a key reference for all researchers in the fields of political science international relations and sociology *Creative Economies in Post-Industrial Cities* Myrna Margulies Breitbart, 2016-05-13 There has been much written on the new creative economy but most work focuses on the so called creative class with lifestyle preferences that favor trendy new restaurants mountain biking and late night clubbing This creative class flagship cultural destinations and other forms of commodity driven cultural production now occupy a relatively uncritical place in the revitalization schemes of

most cities up and down the urban hierarchy In contrast this book focuses on small to medium size post industrial cities in the US Canada and Europe that are trying to redress the effects of deindustrialization and economic decline through cultural economic regeneration It examines how culture infused economic opportunities are being incorporated into planning in distinct ways largely under the radar in many working class communities and considers to what extent places rooted in an industrial past are able to envisage a different economic future for themselves It questions whether these visions replicate strategies employed in larger cities or put forth plans that better suit the unique histories and challenges of places that remain outside the global limelight Exploring the intersection between a cultural and sustainable economy raises issues that are central to how urban regeneration is approached and neighborhood needs and assets are understood Case studies in this book examine spaces and planning processes that hold the possibility of addressing inequality by forging new economic and social relationships and by embarking on more inclusive and collaborative experiments in culture based economic development These examples often focus on building upon the assets of existing residents and broadly define creativity and talent They also acknowledge both the economic and non monetary value of cultural practices This book maintains a critical edge incorporating left critiques of mainstream creative economy theories and practices into empirical case studies that depart from standard cultural economy discourse Structural barriers and unequal distributions of power make the search for viable urban development alternatives especially difficult for smaller post industrial cities and risk derailing even creative grassroots initiatives While acknowledging these obstacles this book moves beyond critique and focuses on how the growing economy surrounding culture the arts and ecological design can be harnessed and transformed to best benefit such cities and improve the quality of life for its residents
