## Cities, Counties and Special Purpose Districts (GAAP)

**The annual report for the fiscal year ended December 31, 2019 is required by Friday, May 29, 2020 (RCW 43.09.230).**

The BARS Manual prescribes accounting and reporting for local governments in accordance with RCW 43.09.200. Its purpose is to provide (1) uniform accounting and financial reporting to allow for meaningful use and comparison of financial data; (2) accounting and reporting instructions as a resource for local government managers; and (3) a consistent framework for financial reporting to intended users, including managers, governing bodies, granting and regulatory agencies, the state Legislature, and the general public.

The manual is maintained by the State Auditor's Office with input from the [Local Government Advisory Committee](#). It is continuously reviewed to ensure prescription and instructions remain current and appropriate to meet the needs of intended users. Accounting and reporting guidance incorporates analysis of generally accepted accounting principles (GAAP) published by the Governmental Accounting Standards Board as they become effective.

This manual is designated for all GAAP cities, counties and special purpose districts. The BARS Manual is currently updated for GASB Statements 1 – 84, 88 and 89. Governments should refer to the source standards when researching or early implementing Statements 87 and 90.

## **Washington Bars Manual:**

**Budgeting for Local Governments and Communities** Douglas Morgan, Kent S. Robinson, Dennis Strachota, James A. Hough, 2017-09-19 Budgeting for Local Governments and Communities is designed as the primary textbook for a quarter or semester long course in public budgeting and finance in an MPA programme. Many currently available texts for this course suffer from a combination of defects that include a focus on federal and state budgeting, a lack of a theoretical governance framework, an omission of important topics, and typically a lack of exercises and datasets for student use. Budgeting for Local Governments and Communities solves all of these problems. The book is exceptionally comprehensive and well written and represents the efforts of veteran authors with both teaching and real world experience. Key Features: Special Focus on Local Government Budgeting focuses exclusively on budgeting at the local levels of American government which are responsible for spending 40 percent of the taxes collected from citizens. Integration of Theory and Practice: teaching cases and chapters capture the lessons learned by professional practitioners who have extensive experience in making local public budgeting work on the ground. Polity Approach to Local Budgeting presents an introduction to local budgeting as the central political activity that integrates the resources of the community into a unified whole. Budgeting is presented as governance work rather than as a unique set of skills possessed by analysts and financial specialists. Legal, Historical, Economic, and Moral Foundations of Local Government Budgeting provides readers with an understanding of how the structures and processes of local budgeting systems are firmly tethered to the underlying core values, legal principles, and historical development of the larger American federal, state, and local political systems. Electronic Datasets and Budgeting Exercises: the text includes access to extensive electronic datasets and practice exercises that provide abundant opportunities for students to learn through doing. Extensive Glossary and Bibliography covers terms on the history and practice of local public budgeting.

**Washington State Comprehensive Alcoholism Plan**, 1978      **Foundations of Public Service** Douglas F. Morgan, Richard T. Green, Craig W. Shinn, Kent S. Robinson, Margaret E. Banyan, 2021-09-30 Designed to serve as a basic text for introductory courses in public administration, this pioneering work provides students with a clear-eyed understanding of the vital management functions covered in most standard textbooks with two important differences. First, it is written to address the needs of both the experienced practitioner and the entry-level public servant. Case examples bridge the content-rich environment of practitioners with the principles of public administration sought by pre-service students. Second, the discussion of management practices is grounded in the political and ethical tensions inherent in the American constitutional form of governance. This innovative approach reflects the authors' belief that public administration operates as an integral part of the country's political traditions and thereby helps define the political culture. Key themes in this third edition include an emphasis on the ways in which public administration and their agents play a critical role in ensuring legal and political accountability of the political system; an exploration of local public administration as the backstop of American democracy.

requiring a close working partnership between part time elected officials and career administrators careful examination of the ways in which the American political economy requires administrators who are skilled at co producing the common good with voluntary associations businesses nonprofit organizations and other governmental entities an understanding that public administration plays a critical role with its prudential judgments in balancing the competing values necessary to secure a regime of ordered liberty Every chapter has been thoroughly updated with particular attention paid to chapters on budgeting and revenue e government and the digital divide shared power and the rise of wicked problems and the future of public administration in the United States amidst deep polarization Foundations of Public Service 3rd Edition provides a framework for understanding American political traditions and how they inform public administration as a political practice It is required reading for all introductory Public Administration courses with an emphasis on practice and real world applications
