Journal of Chromatography, 2003      **Analytical Methods in Wood Chemistry, Pulping, and Papermaking** Eero Sjöström, Raimo Alen, 2013-03-09 In its broadest sense and according to the traditional conception wood chemistry is a comprehensive discipline ranging from fundamental studies to practical applications The manifold constituents located in different morphological regions in the wood results in an extreme complexity of wood chemistry Ever more sophisticated endeavors needing fundamental studies and advanced analytical methods are necessary in order to delve deeper into various problems in pulping and papermaking Gradually new improved analytical methods originally developed for research purposes are currently replacing many of the old routine methods in practical applications Because of the expanse of the subject an attempt to write a book of this size about analytical methods seems perhaps too ambitious Of course a whole book series of several volumes would be necessary to cover this topic completely However there is undoubtedly a need for a more condensed presentation which does not go into experimental details but is limited to the basic principles of the analytical methods and illustrates their applications The emphasis is on more advanced and potential methods and particularly on those based on different types of spectroscopy and chromatography      **Analytical and Chromatographic Techniques in Radiopharmaceutical Chemistry** Donald M. Wieland, Michael C. Tobes, Thomas J. Mangner, 2012-12-06 In 1906 Michael T Sweet first developed the chromatographic method by using an adsorbant to separate pigments Since that time the technological advances in TLC and HPLC have brought about new definitions of purity in parallel with the advances Radiopharmaceutical chemistry is especially dependent on the chromatographic technique because of the relatively small amount of material in most radiopharmaceuticals often so small that the usual physical methods of analytical chemistry cannot be used As a result this collection of papers represents the key to successful radiopharmaceutical development by setting the standard for the present day definition of radiochemical purity William C Eckelman Ph D Diagnostics Associate Director The Squibb Institute for Medical Research New Brunswick New Jersey Preface The chapters herein are updated and expanded versions of presentations that the authors made at a symposium held on June 4 1984 in Los Angeles California under the sponsorship of the Radiopharmaceutical Science Council of the Society of Nuclear Medicine All manuscripts were refereed The intent of the symposium organizers was to enlist participants who work on a day to day basis with the analytical and chromatographic techniques to be discussed at the symposium We feel confident that this distillation of hands on experience will be of value to graduate students as well as experienced researchers in radiopharmaceutical chemistry and
