Addressing the Sexually Transmitted Infections Epidemic in the United States: A Sociomedical Perspective Christopher Williams, Laura Skrip, Darren Whitfield, Keith L. Gray, 2023-12-04 Rates of sexually transmitted infections STIs have significantly increased in the United States Per capita estimates reveal approximately 68 million prevalent and 26 million incident STIs nationally Gonorrhea syphilis and chlamydia the three reportable STIs reached levels not seen in the last fifty years and this resurgence is concurrent with increasing antimicrobial resistance and a dearth of viable candidates in the vaccine pipeline A seminal report by the National Academies of Sciences Engineering and Medicine Sexually Transmitted Infections Adopting a Sexual Health Paradigm confirms that STIs rank among the most pressing and intractable public health threats Furthermore rising rates of STIs exact a substantial societal medical and economic burden that strain public health capacity which has been substantially debilitated in the wake of the Covid 19 pandemic STIs can have serious consequences for sexual reproductive and overall health Untreated syphilis for instance is directly implicated in neurological cardiovascular and dermatological disease Human papillomavirus is a known cause of cervical cancer and is the most common cancer among women globally Hepatitis B increases risk for cirrhosis and primary liver cancer Despite reductions in HIV transmission and improvements in prevention and treatment infections among women girls adolescents and mother to child transmission remain unacceptably high Marginalized racial ethnic minorities LGBTQ persons vulnerable at risk adolescents and young adults and other underrepresented populations are more susceptible to STIs as they negotiate an array of factors that can delay and even preclude access to preventive interventions The United States spends substantially more on STI prevention and treatment yet it consistently bares a disproportionate burden of sexually transmitted infections compared to other Western industrialized nations Access to healthcare erosion and

diversion of public health capacity racism discrimination stigma substandard education and poverty have all been identified as important contributors to the trajectory of acute sexually transmitted infections Furthermore upstream drivers such as national state and local public health policies have been associated with population level STI risk prevention and treatment and as such offer opportunities for ecological observational and multi level analyses to assess their direct and indirect impact on sexual health outcomes In this thematic collection we aim to present an interdisciplinary collection of high quality articles centered on the premise that the rise of emerging and re emerging STIs can be attributed in part to a complex interaction of sociomedical factors beyond individual behavioral risk profiles This Research Topic welcomes a variety of manuscript formats including original research brief reports systematic reviews and perspective manuscripts involving sociomedical factors social determinants of health health disparities infectious disease epidemiology and other drivers including health policies that act as barriers and facilitators of effective STI prevention and treatment Manuscripts that examine structural community institutional interpersonal and broad individual factors linked to STIs are very well suited for this collection Topic areas include but are not limited to Structural racism discrimination and stigma and their influence on prevention treatment and support services among vulnerable and marginalized populations Housing and income insecurity that impede sexual reproductive and overall health Biological factors that affect the spread of STIs including their asymptomatic nature and the influence of sex as a biological variable Intimate partner violence harassment and intimidation Substance abuse sex work sexual networks and normative sexual attitudes and beliefs that impede the adoption of preventive health promoting behaviors Priority populations including adolescents men who have sex with men youth who are LGBTQ and the incarcerated Impact of HIV pre exposure prophylaxis PrEP uptake on STI incidence Culturally specific biopsychosocial behavioral and community based STI interventions to treat and support those afflicted with STIs Community mobilization and community based organization to reduce STIs Community level prevalence of infectious agents Local and holistically integrated STI clinics Public health STI workforce capacity Health in All Policies HiAP approaches to STI prevention and treatment Christopher Williams is the Senior Vice President and Director of Research at National Health Promotion Associates a private research and development firm that specializes in the development testing and dissemination of evidence based approaches to target behavioral risk factors associated with major chronic diseases violence accidents and preventable injuries The other Topic Editors declare no competing interests with regard to the Research Topic subject

and Soft City Binti Singh, Tania Berger, Manoj Parmar, 2023-03-16 This book explores how cities are shaped by the lived experiences of inhabitants and examines the ways they develop strategies to cope with daily and unexpected challenges. It argues that migration, livelihood, and public health challenges result from inadequacies in the hard city urban assets such as land, infrastructure, and housing, and asserts that these challenges and escalating vulnerabilities are best negotiated using the soft city: social capital and community networks. In so doing, the authors criticise a singular knowledge system and argue for a granular, nuanced understanding of cities of the interrelations between people in places, everyday urbanisms, social relationships, cultural practices, and histories. The volume presents perspectives from the Global South and the Global North and engages with city-specific cases from Africa, India, and Europe for a deeper understanding of resilience. Part of the Urban Futures series, it will be of great interest to students and researchers of urban studies, urban planning, urban management, architecture, urban sociology, urban design, ecology, conservation, and urban sustainability. It will also be useful for urbanists, architects, urban sociologists, city and town planners, policy makers, and those interested in a deeper understanding of the contemporary and future city.
