Politically Incorrect Guide to Communism Paul Kengor, 2017-10-02 A brand new installment of the beloved Politically Incorrect Guide series The Politically Incorrect Guide to Communism is a fearless critique of freedom s greatest ideological adversary past and present The Trouble with Textbooks Gary A. Tobin, Dennis R. Ybarra, 2008-07-31 School textbooks in Iran Saudi Arabia Egypt and elsewhere in the Arab and Muslim worlds are filled with anti Western and anti Israel propaganda Most readers will be shocked to discover that history and geography textbooks widely used in America s elementary and secondary classrooms contain some of the very same inaccuracies about Jews Judaism and Israel Did you know that there is no record of any important Jewish contribution to the sciences World Civilizations Thomson Wadsworth Or that Christianity was started by a young Palestinian named Jesus The World Scott Foresman Pearson Supplemental materials and other classroom influences are even worse The Trouble with Textbooks exposes the poor scholarship and untruths in textbooks about Jews and Israel The problems uncovered in this ground breaking analysis are instructive and illustrate the need for reform in the way textbooks are developed written marketed and distributed Substitute another area how we teach American history Western civilization or comparative religion and we have another equally intriguing case study The Trouble

with Textbooks shows what can go terribly wrong in discussing religion geography culture or history and in this case all of them The Trouble with Textbooks tells a cautionary tale for all readers whatever their background of how textbooks that Americans depend on to infuse young people with the values for good citizenship and to help acculturate students into the multicultural salad that is American life instead disparage some groups and teach historical distortions With millions of young people using these textbooks each year the denigration of some should be a concern for all *The Publishers' Trade List Annual* ,1878

detailing and in some cases use of unsuitable materials This report will have achieved its purpose if it serves to avoid these past errors and encourages the development of new ways to protect test and regulate prestressing steels The report is complemented with comments on the properties and corrosion behaviour of different types of prestressing steels The goal of the study is to provide objective arguments for the discussion of failures that have occurred due to corrosion induced failure of prestressing steel In such a way the general regulation given in DIN with respect to reinforcement for robustness may eventually be proven inappropriate The general building authority approval for prestressed hollow filler block floors already supports such an idea It is well known that the hollow block floor industry works without any reinforcing steel The regulations in the standards should not limit in particular the use of these types of prestressing steel cold formed wires strands which have proven not associated with any substantial failures cases reported in the last 35 years The report reviews the historical development with respect to corrosion induced failure of prestressing steel Concerning the circumstances of the failure examples this review partly reflects a specific problem in Germany Also reviewed are other known interregional examples of failure which are incorrectly attributed to the prestressed construction method All cases considered are discussed and the failure reasons thoroughly evaluated also with reference to the results of most recent research Another question addressed is whether one should be concerned over corrosion induced retarded failure even when using new generation prestressing steel with correct corrosion protection Finally a contribution to the following very important question is presented Do the future prestressed structures possess enough safety against structural failure if they are constructed without reinforcement for robustness but otherwise comply completely with the design standards To aid a better understanding of this short report on typical failure cases and their origins the main conditions are set out for corrosion induced failure of prestressing steel in technical applications The properties of different types of prestressing steel and their application limits are given in a special section dealing with the influence of building materials on damage development This report will be of interest to all involved in the construction process Fundamental scientific discussion has been avoided by reference to well accredited detailed information in the technical literature
