D.J. Walmsley, G.J. Lewis, 2014-09-19 First published in 1994 This book comprises a second edition of Human Geography behavioural approaches first published in 1984 The first edition attempted to synthesize the massive volume of geographical literature to have appeared mainly since 1960 concerned with both how people come to know the environment in which they live and with the way in which such knowledge influences subsequent spatial behaviour As with the first edition the rationale for advantages of and shortcomings with behavioural approaches are explored at length in both substantive chapters and in a number of detailed examinations of particular aspects of life in advanced Western society [Justice Matters](#) Kyungsig Samuel Lee, Danjuma G. Gibson, 2022-09-29 The nine chapters in this book along with a critical introduction address complex theological issues relating to structural inequalities of our society exacerbated by the experience of the COVID 19 pandemic Pastoral theology as an academic discipline is not a value free enterprise This book strives to speak against all forms of injustice and to advocate for those who suffer under existing structural inequalities because such a liberative and social transformative task constitutes the fundamental work of pastoral theology Each chapter in this book analyses how private problems of individuals are occurring within the immediate world of experience with public issues historically socially and politically As a whole this book addresses racial injustice ableism foster family care and issues faced by Christian churches during the COVID 19 pandemic The chapters in this book were originally published as a special issue of the Journal of Pastoral Theology **Fundamentals of Sustainable Urban Renewal in Small and Mid-Sized Towns** Avi Friedman, 2018-05-23 The book introduces challenges affecting smaller urban communities with fewer than 50 000 inhabitants and offers urban planning and building architectural strategies to strengthen their city centers It divides urban renewal of small towns into sub components such as environmental challenges demographic trends economic changes and cultural aspects and aging infrastructure In each context is established and principles are outlined and illustrated Topics include urban form mobility and connectivity infill neighborhoods design wealth generation and promotion of local culture and well being Reinforced with detailed case studies Fundamentals of Sustainable Urban Renewal in Small and Mid Sized Towns is an ideal resource for municipal planners architects civil engineers and policy makers [The Cumulative Book Index](#) ,1910 A world list of books in the English language *Research in Education* ,1971 [Resources in Education](#) ,2000-10 **Inventing the Built Environment** Juliana Yat Shun Kei, 2024-06-28 Why and how was the term built environment first introduced Inventing the Built Environment retrieves the origin of this ubiquitous term The articulation of the built environment Kei demonstrates coincided with the redefinition of education research and professional practices in architecture and town planning in 1960s Britain Concentrating on the half decade during which the term permeated the architectural and planning professions this book recalls a time when the built environment was conceived as a part of the British government's effort in national economic planning Inventing the Built Environment unpacks the proposal for a Research Council for the Built Environment to mobilise architecture and town planning for political economy How a relatively

small group of architects planners politicians and researchers transposed scientific thoughts from biology economics and computation into the built environment will be considered too Kei highlights the assumptions about and classification of the population that were made when inventing the built environment The architectural and biosocial implications of the making and remaking of this architectural environmental notion in Britain and beyond will be revealed through the works of pre eminent architect planners including Richard Llewelyn Davies and William Holford At a time when environmental concerns again take the front seat of architectural and planning debates this book offers for scholars and students an alternative lens to reflect on the assumptions and bias that can be embedded in our architectural lexicons

Himalayan Quality of Life Benjamin L. Saitluanga,2017-04-18 The book is a study of intra urban inequality in quality of life QOL in Aizawl city The main objectives of the study include analysis of processes and patterns of social differentiation along the three dimensional space of Aizawl city as well as analysis of spatial inequality in QOL at the lowest administrative structure of the city An investigation into spatial pattern of residential differentiation was done at both horizontal and vertical spaces Spatial variation in well being of residents of Aizawl city and the quality of their immediate environment was also studied by taking both objective and subjective indicators The study employed a number of descriptive inferential and multivariate statistical techniques including correlation factor analysis principal component analysis cluster analysis and spatial autocorrelation methods like Moran s I and Local Indicators of Spatial Association LISA Mapping techniques and graphical methods like Choropleth map histogram and line graph were also used With the help of factor analysis the social space of Aizawl city was found to be differentiated along socio economic status family status household size status workers status and ethnic status The most important factor determining residential differentiation was socio economic status Choropleth map of factor scores reveals that the inner city localities were dominated by high socio economic class while poorer people dominated the peripheries Non local ethnic minorities were few but concentrated in some adjoining peripheral localities as well as in inner city localities which have been inhabited by their ancestors since the colonial period Vertical pattern of residential differentiation was also analyzed by taking income variable as a proxy of socio economic status Multi storey buildings in Aizawl city were co inhabited by both richer people and poorer people The richer people were found at the top floors while the poorer people occupied the basement floors Normally the owners of the buildings were found at the top floors while the basement floors were dominated by the renters Spatial variation in QOL was measured with the help of principal component analysis as a weighting technique by taking variables pertaining to both objective and subjective QOL

dimensions The values of composite QOL index showed that the central localities have scored better than their peripheral counterparts Correlation analysis of the relationship between objective indicators and subjective indicators provided a low positive value indicating the absence of relationship between the two dimensions of quality of life Spatial autocorrelation analysis was also performed to see the pattern of clustering of spatially weighted QOL variables across Local Councils With the help of Global Moran's I spatial clusters and spatial outliers were observed for objective dimension of QOL within the study area The value of Moran's I was found to be insignificant for subjective QOL dimension indicating the absence of significant pattern of clustering The study also identified 7 social areas of Aizawl city on the basis of factor scores and composite scores of QOL variables calculated for all Local Councils The identification of clusters was taken out with the help of hierarchical clustering method of cluster analysis These clusters were labeled appropriate names and their characteristics were described in detail The thesis concluded with recommendation of designating these social areas as social development planning zones for obtaining inclusive development
