sub Saharan African countries have adopted gender budgeting Two countries that have achieved notable success in their efforts are Uganda and Rwanda both of which have integrated gender oriented goals into budget policies programs and processes in fundamental ways Other countries have made more limited progress in introducing gender budgeting into their budget making Leadership by the ministry of finance is critical for enduring effects although nongovernmental organizations and parliamentary bodies in sub Saharan Africa play an essential role in advocating for gender budgeting *Zimbabwe Operational Plan Report Fy 2013* United States Department of State,2014-11-12 The country continues to experience a generalized HIV epidemic with an estimated 1 2 million HIV infected adults and children in 2011 and approximately 58 000 deaths each year Social cultural and economic factors contributing to HIV transmission include transactional sex multiple and concurrent partners alcohol abuse low awareness of HIV infection status lack of ART use in undiagnosed individuals poor treatment adherence and low levels of male circumcision MC While prevalence among youth has dropped significantly it is worth noting that prevalence among girls was twice that of boys of the same age HIV is the leading cause of death among adults and accounts for over 27% of all deaths among mothers and infants Maternal mortality rate nearly tripled between 1994 and 2010 Zimbabwe s TB case rate 603 per 100 000 is one of the highest in the world The TB epidemic in Zimbabwe is largely HIV driven with a very high TB HIV co infection rate at 80% with an increasing number of MDR and XDR cases TB is the second leading cause of adult morbidity and mortality in Zimbabwe National Response The National AIDS Council NAC and the Ministry of Health and Child Welfare MOHCW lead the national HIV AIDS response and have outlined their goals in Zimbabwe National Strategic Plan ZNASPII 2011 2015 While the level of institutional leadership within the MOHCW is high in terms of technical direction and policy setting the capacity for implementation continues to be limited For the MOHCW low capacity is largely an outcome of limited national resources for programming which affects its capacity to deploy and adequately train sufficient experienced health professionals provide adequate commodities and provide a high level of monitoring and supervision to ensure high quality service delivery As such donor resources have been essential to national prevention care treatment and health systems strengthening HSS efforts The majority of HIV AIDS related activities are donor funded Nevertheless Zimbabwe has not received the magnitude of donor funding that countries with similar HIV burden have been fortunate to access Zimbabwe is facing potential critical shortages of key inputs to achieve ambitious goals particularly in the areas of treatment prevention of mother to child transmission PMTCT and MC

successes with prevention of sexual transmission and high treatment coverage compared with relative lack of success with prevention of vertical transmission     AIDS Operational Plan Brian L.
