Short Essay On Water Is Life:

The Water of Life, and Other Sermons Charles Kingsley, 1873

Life From, For and To Water Janos J.

Bogardi, 2025-05-23 This book is translated from Hungarian. It was originally published as the sixth volume of the Building the Future in Water Resources Management series of the Water Science Council of the Hungarian Water Resources Management Directorate. It presents the water resources management of the last 50 plus years as seen, experienced, co-shaped and narrated by Janos Bogardi, a research professor of the Ludovika University of Public Service in Budapest. The author is simultaneously co-opted professor at the University of Bonn and distinguished adjunct professor of the Asian Institute of Technology, Pathumthani, Thailand. Born into a water resources engineering family and growing up in Budapest close to the Danube river pre-determined his professional orientation. He describes with light irony and without the usual memoir style his search for a fulfilling professional life. He discusses his engagement with the inter-university cooperation helping the transition of Central European universities, earning him numerous academic recognitions. Dr. Bogardi's career culminated with assignments as science diplomat and manager working at UNESCO with local scientists in Central Asia, Russia and in Africa. He served as founding director of the UNU Institute for Environment and Human Security. The book concludes with reminiscences to those whose influence and collaboration shaped Dr. Bogardi's career.

Religion, Sustainability, and Place

Steven E. Silvern, Edward H. Davis, 2020-12-14 This book explores how religious groups work to create sustainable relationships between people, places and environments. This interdisciplinary volume deepens our understanding of this relationship, revealing that the geographical imagination, our sense of place, is a key aspect of the sustainability ideas and practices of religious groups. The book begins with a broad examination of how place shapes faith-based ideas about sustainability, with examples drawn from indigenous Hawaiians and the sacred texts of Judaism and Islam. Empirical case studies from North America, Europe, Central Asia and Africa follow, illustrating how a local, bounded and sacred sense of place informs religious-based efforts to protect people and natural resources from threatening economic and political forces. Other contributors demonstrate that a cosmopolitan geographical imagination, viewing place as extending from the local to the global, shapes the struggles of Christian, Jewish and interfaith groups to promote just and sustainable food systems and battle the climate crisis.

Water and Water-Related Phenomena in the Old Testament Wisdom Literature Kivatsi Jonathan

Kavusa, 2019-10-17 Kivatsi Jonathan Kavusa addresses a gap in the field of ecological readings of the Old Testament, exploring the theme of water in the Wisdom books, including the often ignored deuterocanonical works. Kavusa focuses on both the negative and positive potential of water, drawing in particular on four of the Earth Bible principles: intrinsic worth, interconnectedness, voice and purpose. Kavusa begins with a summary of the extant studies and literature reviews on water and water-related motifs in the Old Testament. He then analyses the books of Job, Proverbs, Ecclesiastes and the Deuterocanonical wisdom, examining the various references to water as life-giving or life-threatening entities and expanding upon the

themes of water management and sustainability the intrinsic worth of nature and the unpredicable chaotic state of water This volume concludes with several insights for ecological responsibility and valuable wisdom for an eco theological perspective both in Kavusa s African context and with a more universal application **Dancing in the Water of Life**
