

Sidhartha Gotama grew up in a palace protected from all forms of natural suffering.

However, his father wanted a King not a Buddha so he gave him a lavish life in hopes to deter him from leaving.

Siddhartha became curious about the outside world; he went on a chariot ride through the countryside. During this journey, he saw suffering and became upset at his life.

At the age of 30, he abandoned his lifestyle, and he became a monk. He cut off his hair, and he spent a lot of time in spiritual enlightenment.

After years of living in poverty he did not have anymore answers. Then one day he vowed to sit under a tree until he got the answers to his questions.

Finally after avoiding temptation he became enlightened and wrote his truths creating the religion of Buddhism.

Siddhartha Questions And Answers:

Difficult Questions Have Easy Answers Atina Hseham, 2023-12-06 An inquiry made to obtain any information is known as an interrogation While asking the person tries to get an answer that allows him to satisfy his doubts The interviewers often ask simple questions in a very twisted fashion to confuse the candidates Difficult questions answers reflect the knowledge of the giver as well as his overall personality For example Which is heavier a kilogram of feathers or 1000 grams of lead Solution Both the weights are equal And What happened in Kolkata yesterday from 8 to 9 o'clock Solution An hour had passed These questions have a trick because they are framed in such a way that the answers seem simple but in reality they are not It can be said that the questioners confuse the candidates as they hide their answers using rhetorical resources and various devices In some cases the answer is found in the question itself but in secret Tricky questions are also used for fun or as a mental activity of logical practice Like a truck driver passing down a street in the wrong direction some policemen saw him but they didn't say anything to him why Solution Because the truck driver was on foot He shaves all day but still has a beard who is he Solution Barber Some months have thirty days and others thirty one but how many months have twenty eight Solution Every month has at least twenty eight days Which object becomes wet When it dries Solution Towel How do you draw a square with three lines Solution draw the square first and then draw three lines inside the square Thus an answer to a tricky question can lead to confusion due to the confusion generated question These types of questions are very specific to the areas in which people's knowledge or behavior is evaluated Generally such difficult questions can be perceived as misleading or incorrect because something is being implied that is not in reality However they can also be seen as methods whose precise purpose is to test the candidate and determine whether he or she is fully capable of answering the question that he or she is saying I know In this way about five thousand questions and answers have been given in the present book which is equally useful for all competitive examinations

European and Asian history *Dialogue and Conflict on Religion. Studies of Classroom Interaction in European Countries*
Ina ter Avest, Dan-Paul Jozsa, Thorsten Knauth, Javier Rosón, Geir Skeie, 2009 Regarding teaching about religions and worldviews there is a gap between the ambitions of educational policies and our knowledge about what really happens in the classroom Research on classroom interaction about religion is not very far developed either nationally or as international and as comparative research There is a growing awareness however that research on pupils perspectives on religion in education is needed in order to develop sustainable approaches for future education and this book is a contribution to this research The classroom can be seen as an arena both for learning and for micro politics This arena is shaped and sometimes challenged and restricted or even curtailed by the wider societal and political context In this book we present studies of classroom interaction that focus on the micro sociological level of research The studies presented open up a rather unexplored field of international comparative research on religion in education and the role of diversity for classroom interaction giving deeper insights into what happens in classrooms displaying varieties of interactive patterns and relating these to their specific contexts
