Information Processing in Medical Imaging Gary E. Christensen, Milan Sonka, 2005-07-12 The nineteenth biennial International Conference on Information Processing in Medical Imaging IPMI was held July 11 15 2005 in Glenwood Springs CO USA on the Spring Valley campus of the Colorado Mountain College Following the successful meeting in beautiful Ambleside in England this year's conference addressed important recent developments in a broad range of topics related to the acquisition analysis and application of biomedical images Interest in IPMI has been steadily growing over the last decade This is partially due to the increased number of researchers entering the field of medical imaging as a result of the Whitaker Foundation and the recently formed National Institute of Biomedical Imaging and Bioengineering

This year there were 245 full manuscripts submitted to the conference which was twice the number submitted in 2003 and almost four times the number of submissions in 2001. Of these papers 27 were accepted as oral presentations and 36 excellent submissions that could not be accommodated as oral presentations were presented as posters. Selection of the papers for presentation was a difficult task as we were unable to accommodate many of the excellent papers submitted this year. All accepted manuscripts were allocated 12 pages in these proceedings.

Interventional Magnetic Resonance Imaging Thomas Kahn, Harald Busse, 2012-08-27 The idea of using the enormous potential of magnetic resonance imaging (MRI) not only for diagnostic but also for interventional purposes may seem obvious but it took major efforts by engineers physicists and clinicians to come up with dedicated interventional techniques and scanners and improvements are still ongoing. Since the inception of interventional MRI in the mid 1990s the numbers of settings techniques and clinical applications have increased dramatically. This state of the art book covers all aspects of interventional MRI. The more technical contributions offer an overview of the fundamental ideas and concepts and present the available instrumentation. The richly illustrated clinical contributions ranging from MRI guided biopsies to completely MRI controlled therapies in various body regions provide detailed information on established and emerging applications and identify future trends and challenges.
