

FCC Information

This telephone system equipment has been tested and found to comply with the limits for Class B digital device pursuant to Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. Some cordless telephone systems operate at frequencies that may cause interference to radio, TV, and VCRs. To minimize or prevent such interference, the system base should NOT be placed near or on top of a TV or VCR, and, if interference is experienced, moving the base farther away from the TV and VCR will often reduce or eliminate the interference.

However, there is no guarantee that interference will not occur in a particular installation. If this telephone system does cause harmful interference to radio or television reception, which can be determined by turning the system off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- (1) Increase the separation between the base station and receiver.
 - (2) Connect the base station to an outlet on a circuit different from that to which the receiver is connected.
 - (3) Consult the dealer or an experienced radio/TV technician for help.
- Notice to Hearing Aid Users: This phone system is compatible with inductively coupled hearing aids.

Power Outages: In the event of a power outage, your cordless telephone will not operate. The cordless telephone requires electricity for operation. You should have a telephone that does not require electricity available for use during power outages.

Safety Precautions: Before using your telephone equipment, basic safety instructions should always be followed to reduce the risk of fire, electric shock, and injury to persons. Contact: Nickel-Cadmium Batteries: Batteries must be recycled or disposed of properly. Do not dispose in municipal waste. Only use type AA, Nickel-Cadmium (NiCd) or type AA, Nickel-Metal Hydride (NiMH) rechargeable batteries in the cordless handset. Do not use alkaline or lithium batteries in the cordless handset or charger. Do not mix old and new batteries. Use the same rechargeable battery type. Do not combine rechargeable battery types. Be cautious in handling batteries in order not to short the batteries with conducting materials such as rings, jewelry, and keys. The batteries or conducting materials may overheat and cause burns or fire. Do not dispose of batteries in the Recyclable Inclusions, see the user's manual included with your Gigaset system.

The installation of the base unit should allow at least 6 inches between the base and persons to be in compliance with FCC RF exposure guidelines.

Warranty: The product warranty is contained in the user's manual. Please refer to the manual for complete product warranty details.
