Social Navigation Approach Kristina Höök, David Benyon, Alan J. Munro, 2012-12-06 That s a look at an array of social proxies The purpose was to make it clear that the concept of social proxy is quite general Social proxies can be designed to support a wide range of on line interactions whether they involve conversation or not They may be synchronous or asynchronous and they may be associated with activities which are an end in them selves e g auctions or activities which are simply a means to an end e g waiting in queues We believe that by providing a shared representation of the activity in which participants are involved social proxies can help create shared expectations shared experiences and can serve as a resource which participants can use to structure their individual and collective interactions That is at least our claim However it is important to note that except for the first the proxies described so far are concept pieces meaning that they haven t been implemented and deployed to real situations Now however we will turn to an implemented system and look at a real example 1 4 Experience The Babble System In the previous section we introduced the concept of social proxies and discussed examples illustrating the wide range of situations to which social proxies can be applied In this section we focus on our experience in designing implementing and studying a social proxy in the context of an on line system called Babble
