Estes, M. Joseph Sirgy, 2018-01-22 Media and research tend to focus on social problems in today's world from terrorism and natural disasters to environmental degradation conflict and economic decline Yet many countries are also placing the promotion of well being central at the heart of their social agenda So what can we say about human progress and the development of civilization This book considers the brighter side of our world today by exploring the ways in which wellbeing is on an upward swing globally

Systematically considering indicators of human well being in terms of economics health and education alongside subjective notions of wellbeing the book draws together research and data from around the world It uses the United Nations Development Programme s Human Development Index as an underlying framework from which to examine the ways in which wellbeing has improved since WWII Analysing leading scholarship and empirical work allows the authors to determine policy recommendations for how we might continue to build a better world of human wellbeing BIC 2021 Silvianetri,Nil Firdaus,M. Cheng,2020-05-27 This book brings together perspectives of development economics and law to tackle the relationship between competition law enforcement and economic development It addresses the question of whether and how competition law enforcement helps to promote economic growth and development This question is highly pertinent for developing countries largely because many developing countries have only adopted competition law in recent years about thirty jurisdictions had in place a competition law in the early 1980s and there are now more than 130 competition law regimes across the world of which many are developing countries The book proposes a customized approach to competition law enforcement for developing countries set against the background of the academic and policy debate concerning convergence of competition law The implicit premise of convergence is that there may exist one or a few correct approaches to competition law enforcement which in most cases emanate from developed jurisdictions that are applicable to all This book rejects this assumption and argues that developing countries ought to tailor competition law enforcement to their own economic and political circumstances In particular it suggests how competition law enforcement can better incorporate development concerns without causing undue dilution of its traditional focus on protecting consumer welfare It proposes ways in which approaches to competition law enforcement need to be adjusted to reflect the special economic characteristics of developing country economies and the more limited enforcement capacity of developing country competition authorities

Finally it also addresses the long running debate concerning the desirability and viability of industrial policy for developing countries The author would like to acknowledge the Research Grants Council of Hong Kong for its generous support The work in this book was fully supported by a grant from the Research Grants Council of Hong Kong Project No HKU 742412H
