Sophia Huber,2018-06-13 Knowledge about one's linguistic background especially when it is different from mainstream varieties provides a basis for identity and self. Ancestral values can be upheld, celebrated and rooted further in the consciousness of its speakers. In the case of African American Vernacular English (AAVE) the matter is not straightforward and ultimately the social implications its speakers still face today are unresolved. Through detailed analysis of the four building blocks: phonology, morphology, syntax and vocabulary, Sophia Huber tries to trace the development of AAVE as a literary dialect. By unearthing in what ways AAVE in its written form is different from the spoken variety, long established social stigmata and stereotypes which have been burned into the consciousness of the USA through a initially white dominated literary tradition will be exposed. Analysing fourteen novels and one short story featuring AAVE it is the first linguistic study of this scope.
