possibility of U S forces conducting military operations in urbanized terrain also increases However the weapon systems the U S procures and employs obtain maximum effectiveness in open terrain These weapons prove less capable in urban terrain since their standoff and precision advantages suffer degradation due to buildings and the fleeting nature of enemy personnel U S weaponry also causes a large amount of collateral damage that may also result in civilian casualties which proves politically unacceptable Potential adversaries of the U S realize these limitations and present a target set that proves difficult to locate and engage The target set the enemy uses in urban terrain consists of enemy combatants mixing with non combatants enemy snipers and special purpose teams Assets the U S possesses that can engage elements of the enemy s urban target set include U S Army and Marine Corps snipers However a determination on whether more snipers will effectively defeat the target set requires consideration This monograph analyzes the contemporary operating environment to articulate the enemy s urban target set Next a review of current U S Army and Marine Corps sniping doctrine organization and training establishes the foundation for presenting the sniper s capability to defeat the urban target set In order to provide a balanced argument other possible solutions to engaging and defeating the target set receive consideration Research shows that the sniper company organized at the division level achieves the desired effect of increasing the density of sniper teams on the urban battlefield The costs associated with the sniper company prove acceptable as it requires minimal expenditure concerning personnel and equipment The division sniper company will effectively counter the enemy s urban target set without causing non combatant casualties

Inside the Crosshairs Col. Michael Lee Lanning,2013-06-19 The American sniper could be regarded as the greatest all around rifleman the world has ever known At the start of the war in Vietnam the United States had no snipers by the end of the war Marine and army precision marksmen had killed more than 10 000 NVA and VC soldiers the equivalent of an entire division at the cost of under 20 000 bullets proving that long range shooters still had a place in the battlefield Now noted military historian Michael Lee Lanning shows how U S snipers in Vietnam combining modern technology in weapons ammunition and telescopes used the experience and traditions of centuries of expert shooters to perfect their craft To provide insight into the use of American snipers in Vietnam Lanning interviewed men with combat trigger time as well as their instructors the founders of the Marine and U S Army sniper programs and the generals to whom they reported Backed by hard information and firsthand accounts the author demonstrates how the skills these one shot killers honed in the jungles of Vietnam provided an indelible legacy that helped save American lives in Grenada the Gulf War and Somalia and continues to this day with American troops in Bosnia

The Barrett Rifle Chris McNab,2016-03-24 The Barrett M82A1 and its derivatives are among the most successful sniping rifles ever manufactured Now entering its fourth decade of service the short recoil semi automatic system is capable of firing a devastating 50 caliber round with lethal accuracy over distances of more than 2km Unconfirmed reports from Afghanistan in 2012 accredit the Barrett with one of history s longest ever kills at

2 815m This is the technical history of a rifle initially developed as a sporting firearm but which evolved into a long range sniping rifle and a formidable military anti materiel tool designed to neutralize everything from enemy vehicles to parked aircraft Adopted by snipers across the world the Barrett rifles have seen active service in Operation Desert Storm Iraq and Afghanistan and have become an important addition to police armed services and Special Forces units alike **The Official US Marine Corps Sniping Handbook - REMASTERED** U.
